

TEXTS ADOPTED

P9_TA(2024)0222

Urban wastewater treatment

European Parliament legislative resolution of 10 April 2024 on the proposal for a directive of the European Parliament and of the Council concerning urban wastewater treatment (recast) (COM(2022)0541 – C9-0363/2022 – 2022/0345(COD))

(Ordinary legislative procedure – recast)

The European Parliament,

- having regard to the Commission proposal to Parliament and the Council (COM(2022)0541),
- having regard to Article 294(2) and Article 192(1) of the Treaty on the Functioning of the European Union, pursuant to which the Commission submitted the proposal to Parliament (C9-0363/2022),
- having regard to Article 294(3) of the Treaty on the Functioning of the European Union,
- having regard to the opinion of the European Economic and Social Committee of 22 February 2023¹,
- having regard to the opinion of the Committee of the Regions of 6 July 2023²,
- having regard to the Interinstitutional Agreement of 28 November 2001 on a more structured use of the recasting technique for legal acts³,
- having regard to the letter of 14 September 2023 sent by the Committee on Legal Affairs to the Committee on the Environment, Public Health and Food Safety in accordance with Rule 110(3) of its Rules of Procedure,
- having regard to the provisional agreement approved by the committee responsible under Rule 74(4) of its Rules of Procedure and the undertaking given by the Council representative by letter of 1 March 2024 to approve Parliament's position, in accordance with Article 294(4) of the Treaty on the Functioning of the European Union,
- having regard to Rules 110 and 59 of its Rules of Procedure,

¹ OJ C 146, 27.4.2023, p. 35.

² OJ C, C/2023/250, 26.10.2023, ELI: <http://data.europa.eu/eli/C/2023/250/oj>

³ OJ C 77, 28.3.2002, p. 1.

- having regard to the opinion of the Committee on Agriculture and Rural Development,
 - having regard to the report of the Committee on the Environment, Public Health and Food Safety (A9-0276/2023),
- A. whereas, according to the Consultative Working Party of the legal services of the European Parliament, the Council and the Commission, the Commission proposal does not include any substantive amendments other than those identified as such in the proposal and whereas, as regards the codification of the unchanged provisions of the earlier acts together with those amendments, the proposal contains a straightforward codification of the existing texts, without any change in their substance;
1. Adopts its position at first reading hereinafter set out⁴, taking into account the recommendations of the Consultative Working Party of the legal services of the European Parliament, the Council and the Commission;
 2. Calls on the Commission to refer the matter to Parliament again if it replaces, substantially amends or intends to substantially amend its proposal;
 3. Instructs its President to forward its position to the Council, the Commission and the national parliaments.

⁴ This position replaces the amendments adopted on 5 October 2023 (Texts adopted, P9_TA(2023)0355).

P9_TC1-COD(2022)0345

Position of the European Parliament adopted at first reading on 10 April 2024 with a view to the adoption of Directive (EU) 2024/... of the European Parliament and of the Council concerning urban wastewater treatment (recast) *

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 192(1) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee¹,

Having regard to the opinion of the Committee of the Regions²,

Acting in accordance with the ordinary legislative procedure³,

* TEXT HAS NOT YET UNDERGONE LEGAL-LINGUISTIC FINALISATION.

¹ OJ C 146, 27.4.2023, p. 35

³ Position of the European Parliament of 10 April 2024.

Whereas:

- (1) Council Directive 91/271/EEC⁴ has been substantially amended several times⁵. Since further amendments are to be made, that Directive should be recast in the interests of clarity.
- (2) *Water is a primary good which belongs to everyone and is for everyone and which, as a natural resource that is essential, irreplaceable and indispensable to life, needs to be considered and integrated in its three dimensions: social, economic and environmental.*

⁴ Council Directive 91/271/EEC of 21 May 1991 concerning urban wastewater treatment (OJ L 135, 30.5.1991, p. 40).

⁵ See Annex VII, Part A.

- (3) Directive 91/271/EEC sets the legal framework for the collection, treatment and discharge of urban wastewater and the discharge of biodegradable wastewaters from certain industrial sectors. ***Urban wastewaters can be formed by different mixtures of domestic wastewaters, urban runoff and non-domestic wastewater from other origins. Wastewater from institutions such as offices, schools, kitchens with food preparation, etc. which are predominantly originated from the human metabolism, qualifies as domestic wastewaters as well. The objective of Directive 91/271/EEC is to protect the environment from being adversely affected by insufficiently treated urban wastewater discharges. It has contributed to achieve the objectives established under Directive 2000/60/EC of the European Parliament and of the Council⁶ and other relevant legislation.*** This Directive should continue to pursue the same objective, whilst also contributing to the protection of public health ***in accordance with the One Health approach aiming at sustainably balancing and optimizing the health of people, animals, and ecosystems***, when for instance urban wastewater is discharged in bathing waters or in water bodies used for the abstraction of drinking water, or when urban wastewater is used as an indicator for parameters relevant for public health. It should also ***ensure*** access to sanitation and to key information related to the governance of the urban wastewater collection and treatment activities.

⁶ Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

The Directive should also aim at increasing synergies with climate change adaptation and actions to restore urban ecosystems notably through integrated urban wastewater management planning, whilst making optimal use of digitalisation. Finally, this Directive should contribute to the progressive **reduction** of greenhouse gas (GHG) emissions from urban wastewater collection and treatment activities, notably by further reducing nitrogen emissions but also by promoting energy efficiency and production of renewable energies, and thus should contribute to the 2050 objective of Climate Neutrality established under Regulation (EU) 2021/1119 of the European Parliament and of the Council⁷. ***In line with Article 193 of Treaty on the Functioning of the European Union, Member States may go beyond the minimum requirements set out in this Directive, for instance by applying more stringent deadlines or thresholds than those included in this Directive, and/or by reaching energy and/or climate neutrality more rapidly and/or by imposing additional requirements for or broadening the spectrum of the application of their national Extended Producer Responsibility systems.***

⁷ Regulation (EU) 2021/1119 of the European Parliament and of the Council of 30 June 2021 establishing the framework for achieving climate neutrality and amending Regulations (EC) No 401/2009 and (EU) 2018/1999 ('European Climate Law') (OJ L 243, 9.7.2021, p. 1).

- (4) In 2019, the Commission performed an evaluation of Council Directive 91/271/EEC under the Regulatory Fitness and Performance Programme⁸ (the ‘evaluation’). It became apparent from that exercise that certain provisions of the Directive needed to be updated. Three important sources of remaining load of pollution from urban wastewater that could be avoided were identified, namely storm water overflows and ***polluted discharges of*** urban runoff, potentially mal-functioning individual systems (i.e. systems treating domestic wastewater that is not entering collecting systems) and small agglomerations that are currently not completely covered by Directive 91/271/EEC. Those three sources of pollution constitute a significant pressure on surface water bodies in the Union. Moreover, the report of the evaluation also highlighted the need to improve the transparency and governance of the urban wastewater activities, to seize the opportunity offered by the urban wastewater treatment sector to use its potential for renewable energy development and make tangible steps towards energy neutrality as a contribution to climate neutrality and to harmonise urban wastewater surveillance of health parameters, such as the COVID-19 virus and its variants, as a support for public health action.

⁸ Commission Staff Working Document, Executive Summary of the Evaluation of the Council Directive 91/271/EEC of 21 May 1991, concerning urban ***wastewater*** treatment (SWD(2019) 701 final).

- (5) Small agglomerations constitute a significant pressure on 11 % of the surface water bodies in the Union⁹. To better tackle the pollution from such agglomerations, and to prevent discharges of untreated urban wastewater into the environment, the scope of this Directive should include all agglomerations of 1 000 population equivalent (p.e.) and above.
- (6) In order to ensure effective treatment of urban wastewater before discharge into the environment, all urban wastewaters from agglomerations of 1 000 p.e. and above should be collected in centralised collecting systems, *unless Member States justify a derogation for the use of individual systems under this Directive. When delineating their agglomerations, Member States should take into account the indicative reference threshold of 10 to 25 p.e. per hectare above which the population, possibly combined with economic activities, located in a specific area are considered sufficiently concentrated.* Where *collecting* systems are already in place, Member States should ensure that all sources of *domestic* wastewater are connected to them.

⁹ EEA report, European waters: Assessment of status and pressures 2018, No 7/2018.

(7) *Significant investments will be necessary to implement the new requirements introduced by this recast Directive. It is therefore necessary to take account the specific situation of each Member States and, where necessary, adapt the deadlines for the implementation of some demanding requirements. For instance, Member States having a large number of small agglomerations concerned by the new requirements of the Directive in terms of collection and treatment of urban wastewater for agglomerations between 1 000 and 2 000 p.e., should be allowed to extend the deadlines for compliance with these new requirements in their first national implementation plan. This should also be the case for Member States having a large number of facilities (above 50 %) to be upgraded to tertiary treatment in line with the new requirements of the revised Directive.*

Agglomerations below 2 000 p.e. where collecting systems are already in place and discharging urban wastewater into treatment plants located in a different agglomeration should not be counted in the calculation of the percentage related to these time derogations. Moreover, a few Member States who acceded to the Union most recently had to make more recent investments to implement the requirements of the previous Directive. These Member States are marked in addition with high amounts of rural areas with a high outflux of population from their rural areas in addition to an ageing rural population. It is therefore necessary to take account the specific situation of Romania, Bulgaria, and Croatia, by allowing them to extend the deadlines for compliance with these new requirements in their first national implementation plan.

- (8) *When archaeologically valuable sites are encountered during infrastructural works, such as the building of collecting systems or urban wastewater treatment plants, these works are often delayed due to the need to perform archaeological studies on the site in accordance to national law. Therefore, it makes sense to adapt the implementation deadlines in these specific cases. More specifically, when Member States establish that due to the necessity to preserve cultural heritage, the achievement of the required infrastructure is particularly difficult, they should be allowed to adapt the implementation deadlines in specific areas, and update accordingly their national implementation programme. The extensions of the deadlines should be set for each area and kept as short as possible, not exceeding 8 years. Cultural heritage should be intended according to the definition in Article 1 of the 1972 UNESCO World Heritage Convention.*
- (9) **█** Where it can be demonstrated that the establishment of a centralised urban wastewater collecting system *or the connection to a collecting system* would produce no *benefit for the environment or human health, or be technically not feasible* or involve excessive costs, *and only in these cases*, Member States should be allowed to use individual systems to *collect, store and/or* treat urban wastewater, as long as they ensure the same level of *protection of the environment and human health as secondary and tertiary treatment*. Individual systems *can include different types of collection, storage and treatment systems such as nature-based solutions, small-sized treatment systems, temporary tanks combined with regular evacuation to treatment plants*. Member States should *also exchange best practice on the use and operation of individual systems* **█** .

(10) *For this purpose, Member States should establish national, regional or local registers to identify individual systems and temporary storages used on their territory and take all necessary measures to ensure that the design of such systems is adequate, that the systems are properly maintained and that they are subject to a regular compliance control on the basis of a risk-based approach. In particular, Member States should ensure that individual systems used for the collection, storage and/or treatment of urban wastewater are impervious and leak-proof, and that monitoring and inspection of the systems are carried out at regular and fixed intervals. Taking into account the disproportionate costs for adapting the design to the new design requirements, the new requirements on design should not apply to systems established prior to the entry into force of this Directive. Where individual systems are used to collect and/or treat more than 2 % of the urban wastewater load at national level from agglomerations of 2 000 p.e. and above, Member States should provide the Commission with justifications for the reasons for the use of individual systems instead of collecting systems, the level of compliance of those systems with established standards under this Directive and measures taken to reduce the use of such systems. The Commission should be empowered to adopt implementing acts to establish the format of the reporting and the level of details of the information to be provided by national authorities.*

- (11) *As a result of precipitation such as rain, snow or meltwater*, storm water overflows and urban runoff, represent a sizeable remaining source of pollution discharged into the environment. Those emissions are expected to increase due to the combined effects of urbanisation and progressive change of the rain regime linked with climate change. ***Urban wastewater management infrastructures are therefore particularly vulnerable to climate change.*** Solutions to reduce that source of pollution should be defined at local level taking into account the specific local conditions. They should be based on an integrated quantitative and qualitative water management in urban areas. Therefore, Member States should ensure that integrated urban wastewater management plans are established at local level for all agglomerations of 100 000 p.e. and above as those agglomerations are responsible for a significant share of the pollution emitted. Furthermore, integrated urban wastewater management plans should also be put in place for agglomeration of between 10 000 p.e. and 100 000 p.e. where storm water overflows or urban runoff poses a risk for the environment or public health. ***In these plans, measures should be set out that aim at limiting the pollution from storm water overflows to no more than 2 % of the annual collected urban wastewater load calculated in dry weather flow conditions calculated on the basis of the pollutants in Tables 1 and 2 in Annex I.***

(12) *These plans should include measures to reduce the pollution from storm water overflows and also address the potentially significant pollution coming from separately collected urban runoff, for instance the pollution coming from first rains after long dry periods in densely populated areas. These plans should also include measures to prevent pollution at source and favour nature-based solutions over those that would require the establishment of grey infrastructure. These measures could include preventive temporary measures aimed at avoiding the entry of unpolluted rain waters into collecting systems or temporary storage, including natural water retention, and appropriate treatment of these heavy loaded first rains. Member States are encouraged to increase green and blue spaces in urban areas and should take into account the Urban Greening platform which provides guidance and knowledge to support towns and cities. In order to ensure an adequate coverage of the integrated urban wastewater management plans and a comprehensive solution to storm water problems, those plans should be established for drainage areas of the concerned agglomerations.*

- (13) In order to ensure that the integrated urban wastewater management plans are cost-effective, it is important that they are based on best practices in advanced urban areas. Therefore, the measures to be considered should be based on a thorough analysis of the local conditions and should favour a preventive approach aiming at limiting the collection of unpolluted rain waters and optimising the use of existing infrastructures ***to generate energy savings and contribute to emission reduction.*** With a preference for ‘green’ ***and ‘blue’*** developments ***and investments***, new grey infrastructures should only be envisaged where absolutely necessary. In order to protect the environment, in particular the coastal and marine environment, and public health, ***including the protection of surface, ground and drinking water***, from being adversely affected by the discharge of insufficiently treated urban wastewater, secondary treatment should be applied to all discharges of urban wastewater from agglomerations of 1 000 p.e. and above.
- (14) ***In order to protect the environment, in particular the coastal and marine environment, and public health from being adversely affected by the discharge of insufficiently treated urban wastewater, secondary treatment should be applied to all discharges of urban wastewater from agglomerations of 1 000 p.e. and above. Due to the expansion of the scope of the Directive including smaller agglomerations, Member States should be given sufficient time to establish the required infrastructures to meet these obligations. Similarly, enough time should be given to Member States to adapt their treatment infrastructures for agglomerations discharging their wastewaters into coastal waters, or ‘less sensitive areas’ where secondary treatment was not required under Council Directive 91/271/EEC.***

(15) *Discharges to high mountain areas (above 1 500 m altitude), and small agglomerations below 2 000 p.e. in cold climate areas with an annual average temperature below 6 degrees where it is difficult to apply an effective biological treatment because of low temperatures should be allowed to use less stringent treatment than secondary treatment, provided that detailed studies demonstrate that such discharges do not have adverse effects on the environment and human health. Similarly, discharges into deep marine waters from smaller agglomerations of less than 150 000 p.e. located in less populated outermost regions, with less than 275 000 inhabitants characterised by difficult topography, such as steep slopes and discharging their urban wastewaters into deep marine waters in the open ocean, favouring a high level of dilution of these urban wastewater discharges into the receiving waters, should also benefit from this derogation. Nevertheless, in order to ensure an equal treatment of all Member States and in order to ensure a high level of protection of the environment and human health on the whole territory of the European Union, this derogation should be limited to 20 years – which is the time required to progressively upgrade the remaining facilities to secondary treatment in these areas where secondary treatment might be more difficult to apply. These derogations should be granted provided that detailed studies demonstrate that such discharges do not have adverse effects on the environment and human health and do not impact the compliance of the receiving waters with other relevant European legislation such as the Bathing Water Directive, the Water Framework Directive or the Marine Strategy Framework Directive.*

- (16) The evaluation showed that significant reductions of nitrogen and phosphorus emissions were achieved through the implementation of Directive 91/271/EEC. Nevertheless, urban wastewater treatment plants remain, according to the evaluation, an important pathway of those pollutants into the environment, directly leading to eutrophication of water bodies and seas in the Union. Part of this pollution can be avoided as technological progress and best practices in place show that emission limit values established under Directive 91/271/EEC for nitrogen and phosphorus are outdated and should be strengthened, *especially for larger treatment plants*. Tertiary treatment should be systematically imposed to all urban wastewater treatment plants **150 000** p.e. and above, as such plants represent an important remaining source of nitrogen and phosphorus discharge.

- (17) Tertiary treatment should also be mandatory in agglomerations of 10 000 p.e. and above that are discharging in areas subject to, or at risk of, eutrophication. In order to ensure that efforts to limit eutrophication are coordinated at the level of the relevant basins for the whole catchment zone, **and to ensure a consistent designation of sensitive areas across the European Union**, areas where eutrophication is considered an issue according to currently available data should be listed in this Directive. Additionally, to ensure coherence between relevant Union legislation, Member States should identify other areas subject to, or at risk of, eutrophication on their territory, **and identify whether the areas are nitrogen- or phosphorus-sensitive** notably on the basis of data collected under Directive 2000/60/EC, Directive 2008/56/EC of the European Parliament and of the Council¹⁰ and Council Directive 91/676/EEC¹¹. The reinforcement of the limit values, a more coherent and inclusive identification of the areas sensitive to eutrophication and the obligation to ensure tertiary treatment for all large facilities will, in combination, contribute to limit eutrophication. Since this will require additional investments on the national level, Member States should be given sufficient time to establish the required infrastructure.

¹⁰ Directive 2008/56/EC of the European Parliament and of the Council of 17 June 2008 establishing a framework for community action in the field of marine environmental policy (Marine Strategy Framework Directive) (OJ L 164, 25.6.2008, p. 19).

¹¹ Council Directive 91/676/EEC of 12 December 1991 concerning the protection of waters against pollution caused by nitrates from agricultural sources (OJ L 375, 31.12.1991, p. 1).

- (18) Recent scientific knowledge underpinning several Commission strategies¹² **highlights** the need to take action to address the issue of **micropollutants**, which are now detected **usually** in all waters in the Union. Some of those micropollutants are hazardous for public health and the environment even in **low concentrations, of micrograms per litre or below. Whilst the primary, secondary and tertiary treatment already remove some micropollutants**, an additional treatment, i.e. quaternary treatment, should be introduced in order to ensure that a large spectrum of **the remaining micropollutants are** removed from urban wastewater. Quaternary treatment should first focus on organic **micropollutants**, which represent a significant part of the pollution and for which removal technologies are already designed. The treatment should be imposed based on the precautionary **principle** combined with a risk-based approach. Therefore, all urban wastewater treatment plants of **150 000** p.e. and above should provide quaternary treatment, as those facilities represent a significant share of **micropollutant** discharges in the environment and the removal of **micropollutants** by urban wastewater treatment plants at such scale is cost-effective **For these treatment plants of 150 000 p.e. and above, Member States should ensure a prioritisation of the required investments so that the facilities where the risks for human health and the environment are the highest are equipped without delays.**

¹² Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: A European Strategy for Plastics in a Circular Economy (COM/2018/028 final); Communication from the Commission to the European Parliament, the Council and the European Economic and Social Committee, European Union Strategic Approach to Pharmaceuticals in the Environment (COM(2019) 128 final); Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, Chemicals Strategy for Sustainability Towards a Toxic-Free Environment (COM(2020) 667 final); Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, Pathway to a Healthy Planet for All EU Action Plan: ‘Towards Zero Pollution for Air, Water and Soil’ (COM/2021/400 final).

For agglomerations of \geq 10 000 p.e. and **above**, Member States should be required to apply quaternary treatment to areas identified as sensitive to pollution with **micropollutants** based on clear criteria, which should be specified. Such areas should include locations where treated urban wastewater discharge to water bodies result in low dilution ratios, or where the receiving water bodies are used for the production of drinking water, **for shellfish production** or as bathing waters. **Member States should have the possibility not to apply quaternary treatment in these areas when a risk assessment shows that there is no potential danger from micropollutants to human health and/or the environment. For all other types of water bodies in** agglomerations of \geq 10 000 p.e. and **above**, Member States **should assess the risks that the discharge of micropollutants in urban wastewater poses on** the environment or to public health on the basis of a standardised risk assessment **and apply quaternary treatment only where needed according to the results of the risk assessment. Where there are several urban wastewater treatment plants in an agglomeration of above 10 000 p.e. identified as sensitive to pollution with micropollutants, only those discharging into the area at risk should be required to apply quaternary treatment.** In order to give Member States enough time to plan and deliver the necessary infrastructures, the requirement of quaternary treatment should progressively apply until **2045** with clear interim objectives.

- (19) In order to ensure the continued compliance of discharges from wastewater treatment plants with the requirements for secondary, tertiary and quaternary treatment, samples should be taken in accordance with the requirements of this Directive and those samples should comply with the parametric values that it sets out. In order to take into account possible technical variations in the results from those samples, a maximum number of samples failing to conform to those parametric values should be laid down.

(20) The quaternary treatment necessary to remove *micropollutants* from urban wastewater will imply additional costs, such as costs related to monitoring and new advanced equipment to be installed in certain urban wastewater treatment plants. In order to cover these additional costs and in accordance with the polluter-pays principle expressed in Article 191(2) of the Treaty on the Functioning of the European Union (TFEU), it is essential that the producers placing on the Union market products containing substances which, at the end of their life, are found as *micropollutants* in urban wastewaters (‘*micropollutant* substances’) take responsibility for the additional treatment required to remove those substances, generated in the context of their professional activities. A system of extended producer responsibility is the most appropriate means to achieve this, as it would limit the financial impact on the taxpayer and water tariff, while providing an incentive to develop greener products. ***In this context, the extended producer responsibility should apply regardless of whether the products are placed on the market, or whether their individual components were manufactured in a Member State or third country, or whether the producers have a registered office in the European Union or the product is placed on the market via a digital platform.*** Pharmaceuticals and cosmetic residues currently represent the main sources of *micropollutants* found in urban wastewater requiring an additional treatment (quaternary treatment). Therefore, extended producer responsibility should apply to those two product groups. ***Based on the results of the urban wastewater monitoring and the most recent scientific data, the Commission should regularly evaluate whether other industrial sectors should be included in the Extended Producer Responsibility system.***

(21) *According to the available data, the potential increase of costs of the products or the potential reduction of the profit margins of the industries placing the products on the Union market due to the application of the extended producer responsibility would be marginal at EU level and would not endanger the affordability, availability and accessibility to these products on the EU market. Member States should however take into consideration the possible impacts of the application of the requirements of the Extended Producer Responsibility on the accessibility, availability and affordability of products at national level, in particular medicines, placed on the Union market and the level playing field. Member States can take action to ensure sufficient funds are available, including by financing part of the costs for the quaternary treatment. Given that Member States might choose different implementation approaches, attention should be paid to the functioning of the internal market and in any forthcoming evaluation of the Directive the Commission should assess any potential impacts in this regard.*

- (22) Exonerations from the extended producer responsibility obligations should nevertheless be *possible. This should be the case* where *the total amount of substances contained in* products placed on the *Union* market *by a producer amount to* small quantities, i.e. less than *1 tonne per year*, since the additional administrative burden for the producer would in such cases be disproportionate compared to the environmental benefits. Exonerations should also be possible *for the part of their products for which* the producer can demonstrate that no *micropollutants* are generated at the end of life of a product *or* where it can be proven that the residues from a product are rapidly biodegradable in the wastewaters and the environment or not reaching the urban wastewater treatment plants. The Commission should be empowered to adopt implementing acts to establish detailed criteria to identify the products placed on the *Union* market that do not generate *micropollutants* in wastewaters at the end of their life, *their hazardousness and their biodegradability*. When developing these criteria, the Commission should take into account *criteria already set in Regulation (EC) No 1272/2008 of the European Parliament and of the Council¹³ on classification, labelling and packaging of substances and mixtures, but also* scientific or other available technical information, including relevant international standards. *These criteria should be established before the Extended Producer Responsibility systems enter into force.*

¹³ Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (OJ L 353, 31.12.2008, p. 1).

- (23) In order to avoid possible internal market distortions, minimum requirements for the implementation of the extended producer responsibility should be established in this Directive, while the practical organisation of the system should be decided at national level. *In order to favour the substitution of substances and products generating micropollutants residues in urban wastewater*, the contributions of the producers should be proportionate to the quantities of the products they place on the market and the *hazardousness* of their residues. The contributions should cover, but not exceed, the *investment and operational* costs for the monitoring activities for *micropollutants*, the collection, reporting and impartial verification of statistics on the quantities and hazardousness of products placed on the *Member States* market, and the application of the quaternary treatment to urban wastewater in an efficient manner. *These contributions should also cover operational costs of already established quaternary treatment at the entry into force of the Directive when it is necessary to meet the obligations of the extended producer responsibility systems. It should also cover part of the investment costs of these established quaternary treatments taking into account the depreciation of the investments and the deadlines of the financing obligations established in* this Directive. Since urban wastewater is treated collectively, it is appropriate to introduce a requirement for producers to join a centralised organisation which can implement their obligations under the extended producer responsibility on their behalf.

- (24) The evaluation has also shown that the wastewater treatment sector offers the opportunity to significantly reduce its own energy consumption and to produce renewable energy, for example by better use of the available surfaces in urban wastewater treatment plants for solar energy production or by producing biogas from sludge *as well as by heat or kinetic energy or other renewable energy sources*. The evaluation also illustrated that, without clear legal obligations, only partial progress can be expected in this sector. In this context, Member States should be required to ensure that the total annual energy used by all urban wastewater treatment plants on their national territory treating a load of 10 000 p.e. and above does not exceed the production of energy from renewable sources as defined in Article 2(1) of Directive (EU) 2018/2001 of the European Parliament and of the Council¹⁴, by those urban wastewater treatment plants. *In order to take into account the specificities of each urban wastewater treatment plant, optimise the investments needed and provide for the required flexibility to reach the energy neutrality objective, while ensuring that the potential for renewable energy production and for energy savings is fully seized, that objective should be met at national level and not for each treatment plant. All renewable energies produced by the urban wastewater treatment plants operators or their owners, whether on-site or off-site, such as hydraulic, solar, thermal, wind energy or biogas, should be taken into account.* That objective should be progressively met with interim targets by 31 December 2045. *A limited amount of non-fossil energy, not directly linked to urban wastewater treatment activities, may be purchased from external sources in 2040 and 2045, through the use of a derogation linked to conditions.* Reaching this energy neutrality target will contribute to *notably* reduce the avoidable greenhouse gas (GHG) emissions from the sector **█**, while supporting the achievement of the 2050 climate neutrality objectives and related national and Union objectives, **█** such as the objectives set out in Regulation (EU) 2018/842 of the European Parliament and of the Council¹⁵.

¹⁴ Directive (EU) 2018/2001 of the European Parliament and of the Council of 11 December 2018 on the promotion of the use of energy from renewable sources (OJ L 328, 21.12.2018, p. 82).

¹⁵ Regulation (EU) 2018/842 of the European Parliament and of the Council of 30 May 2018 on binding annual greenhouse gas emission reductions by Member States from 2021 to 2030 contributing to climate action to meet commitments under the Paris Agreement and amending Regulation (EU) No 525/2013 (OJ L 156, 19.6.2018, p. 26).

However, initiatives to achieve energy neutrality should not lead to an increased emission of methane and nitrous oxide. In line with Directive (EU) 2018/2001, Member States should facilitate permit granting procedures for renewable energy projects required to reach energy neutrality of this sector. Encouraging EU-based biogas or solar energy production while enhancing energy efficiency measures in line with the Energy Efficiency First principle¹⁶ *and making an optimal use of digitalisation*, which means taking utmost account of cost-efficient energy efficiency measures in shaping energy policy and making relevant investment decisions, will also help reduce the Union energy dependence, one of the objectives expressed in the Commission ‘Repower EU’ Plan¹⁷. It is also in line with Directive (EU) 2018/844 of the European Parliament and of the Council¹⁸ and with Directive (EU) 2018/2001 in which urban wastewater treatment sites are qualified as ‘go-to’ areas for renewables, meaning a location designated as particularly suitable for the installation of plants for the production of energy from renewable sources. In order to reach the objective of energy neutrality via optimal measures for each urban wastewater treatment plant and for the collection system, Member States should ensure that energy audits, *as defined in Directive (EU) 2023/1791 of the European Parliament and of the Council*¹⁹, *are carried out* every four years. Those audits should *also* include an identification of the potential for *reduction of energy consumption, cost-effective recovery and use of waste heat, either onsite or via a district energy system, or* cost-effective use or production of renewable energy following the criteria set out in Annex VI to Directive 2012/27/EU *of the European Parliament and of the Council*²⁰. *The generation of renewable energy by or on behalf of the owners or operators of the urban wastewater treatment plant should not comprise the*

¹⁶ Commission Recommendation (EU) 2021/1749 of 28 September 2021 on Energy Efficiency First: from principles to practice — Guidelines and examples for its implementation in decision-making in the energy sector and beyond.

¹⁷ Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions: REPowerEU Plan (COM/2022/230 final).

¹⁸ Directive (EU) 2018/844 of the European Parliament and of the Council of 30 May 2018 amending Directive 2010/31/EU on the energy performance of buildings and Directive 2012/27/EU on energy efficiency (*OJ L 156, 19.6.2018, p. 75*).

¹⁹ *Directive (EU) 2023/1791 of the European Parliament and of the Council of 13 September 2023 on energy efficiency and amending Regulation (EU) 2023/955 (JO L 231, 20.9.2023, p. 1)*.

²⁰ Directive 2012/27/EU of the European Parliament and of the Council of 25 October 2012 on energy efficiency, amending Directives 2009/125/EC and 2010/30/EU and repealing Directives 2004/8/EC and 2006/32/EC (OJ L 315, 14.11.2012, p. 1).

purchase of renewable energy.

(25) Since achievements in methane emission reduction bring more effective greenhouse gas reductions than carbon dioxide emission reductions proportionately, and due to the wastewater sector being identified as one of the main emitting sectors for methane emissions, the wastewater sector should monitor and aim to reduce methane emissions as outlined in the Global Methane Pledge, similar to the Methane Emissions Reduction in the Energy Sector Regulation, to ensure the wastewater sector's contribution towards the achievement of the climate neutrality target by 2050 at the latest, as set out in the European Climate Law.

(26) Since the transboundary nature of water pollution requires cooperation between neighbouring Member States or third countries in addressing such pollution and identifying measures to tackle its source, Member States should be required to inform each other or the third country if significant water pollution originating from urban wastewater discharges in one Member State or third country impacts or is likely to impact the water quality of another Member State or third country. Such information should be immediate in case of incidental pollution significantly affecting downstream water bodies ***and responses should be communicated in a timely manner. Where Member States have previous agreements between them or with third countries on environmental water issues, cooperation through these agreements may be taken into account.*** The Commission should be informed and, if necessary, participate in meetings at the request of Member States. It is also important to tackle the transboundary pollution from third countries sharing the same water bodies with some of the Member States. For the purpose of dealing ***with*** pollution coming or arriving in third countries, the cooperation and coordination with third countries may be carried out in the framework of the United Nations Economic Commission for Europe (UNECE) Water Convention²¹ or other relevant regional Conventions such as the Regional Seas or Rivers Conventions.

²¹ UNECE Convention on the Protection and Use of Transboundary Watercourses and International Lakes as amended, along with decision VI/3 clarifying the accession procedure.

- (27) In order to ensure the protection of the environment and human health, Member States should ensure that the *collecting systems and* urban wastewater treatment plants built to comply with the requirements of this Directive are designed, constructed, operated, and maintained to ensure sufficient performance under all normal local climatic conditions. *As urban wastewater infrastructure has been recognised as critical entities under Directive (EU) 2022/2557 of the European Parliament and of the Council²² on the resilience of critical entities, Member States should also ensure that urban wastewater treatment plants and collecting systems are assessed as regards their vulnerability to extreme events occurring due to climate change when they are being designed, constructed, and operated.*

²² Directive (EU) 2022/2557 of the European Parliament and of the Council of 14 December 2022 on the resilience of critical entities and repealing Council Directive 2008/114/EC (OJ L 333, 27.12.2022, p. 164).

(28) Urban wastewater treatment plants also receive non-domestic wastewater, including industrial wastewater, which can contain a range of pollutants not explicitly covered by Directive 91/271/EEC, such as heavy metals, *microplastics, micropollutants* and other chemicals, *including per- and polyfluoroalkyl substances (PFAS)*. *This non-domestic wastewater may come from industries, or commercial establishments, or hospitals and other medical facilities, etc.* In most instances, there is a poor understanding and knowledge of such pollution which could deteriorate the functioning of the treatment process and contribute to the pollution of the receiving waters, but also prevent the recovery of sludge and the *reuse* of treated wastewater. Member States should therefore regularly monitor and report on such non-domestic pollution that enters the urban wastewater treatment plants and is discharged into water bodies. To prevent pollution from non-domestic wastewater discharges at source, releases from industries or enterprises connected to collecting systems should be subject to prior *regulations and/or specific* authorisation *by the competent authority or appropriate body*. In order to ensure that collecting systems and urban wastewater treatment plants are technically capable of receiving and treating the incoming pollution, the operators who manage urban wastewater treatment plants receiving non-domestic wastewater should be consulted *and informed* before those permits are issued *or the regulations are adopted*, and should be able to consult, *on request*, the issued permits in order to be able to adapt their treatment processes. Where non-domestic pollution is identified in the incoming waters, Member States should take appropriate measures to reduce pollution at source, by enhancing the monitoring of pollutants in collecting systems so that the pollution sources can be identified and, where necessary, by reviewing the authorisations provided to relevant, connected urban wastewater treatment plants. ■

(29) *The water resources of the Union are increasingly under pressure, resulting in permanent or temporary water scarcity in some areas of the Union. The Union's ability to respond to the increasing pressures on water resources could be improved through a wider reuse of treated urban wastewater, limiting freshwater abstraction from surface and groundwater bodies. Therefore, the reuse of treated urban wastewater should be encouraged and applied whenever appropriate, especially in water-stressed areas, and for all appropriate purposes, whilst ensuring minimum ecological flow of the receiving waters and taking into account the need to ensure that the objectives of good ecological and chemical status of the receiving bodies, as defined in Directive 2000/60/EC, are met. To achieve this, Member States should carry out monitoring of the impact of the reuse of treated urban wastewater on minimum ecological flow of receiving waters in their assessment of impacts carried out under Directive 2000/60/EC. The potential for the reuse of treated wastewater should be assessed taking into account the river basin management plans established under the Water Framework Directive 2000/60/EC and Member States' decisions under Article 2(2) of Regulation (EU) 2020/741 of the European Parliament and of the Council²³, whilst taking into account the need to ensure that the objectives of good ecological and chemical status of the receiving bodies, as defined in Directive 2000/60/EC, are met. The reinforcement of the requirements for the treatment of urban wastewater, and the actions to better monitor, track and reduce pollution at source, will have impacts on the quality of treated urban wastewater, and will therefore support water reuse. Where water reuse serves the purpose of agricultural irrigation, it should be carried out in accordance with Regulation (EU) 2020/741. Where appropriate to ensure the safe reuse of treated urban wastewater, Member States should consider quaternary treatment for the urban wastewater that is reused or will be reused. Measures on promoting the reuse of treated wastewater and on the actual reuse should be considered in strategies on water resilience at Member States level, when such strategies are available.*

²³ Regulation (EU) 2020/741 of the European Parliament and of the Council of 25 May 2020 on minimum requirements for water reuse (OJ L 177, 5.6.2020, p. 32).

- (30) *The nutrients contained in urban wastewaters may be useful in cases where treated urban wastewaters is reused in agriculture in accordance with Regulation (EU) 2020/741. In those cases, Member States may benefit, under specific conditions to ensure the highest level of protection of the environment and human health, from a derogation to the obligation to apply tertiary treatment in accordance with Article 7 of this Directive only for the part of the treated urban wastewater that is reused in agriculture.*
- (31) In order to ensure a proper implementation of this Directive and notably the respect of the emission limit values, it is important to monitor discharges of treated urban wastewater into the environment. The monitoring should be done through the establishment at national level of **■** mandatory prior *regulation and/or prior* authorisation system in order to discharge the treated urban wastewater into the environment. In addition, in order to prevent unintentional discharges of biomedica *in* the environment from urban wastewater treatment plants using this technique, it is essential to include in the discharge authorisations specific obligations to continuously monitor and prevent such discharges. *Such biomedica are usually made of plastic and might include inter alia biocarriers, biobeads or polystyrene beads.*

- (32) *Where necessary, Member States should adapt their urban wastewater collection and treatment infrastructures to the evolution of their population and the associated load of domestic wastewater in order to remain compliant with the requirements of this Directive. The possible impact of discharges on water bodies resulting from the construction and adaptation of such infrastructures should not be considered as a breach of their obligations under Directive 2000/60/EC provided that all the conditions laid down under this Directive are fulfilled.*
- (33) In order to ensure the protection of the environment, direct discharges of biodegradable non-domestic wastewater into the environment from certain industrial sectors should be subject to prior authorisation on national level and appropriate requirements. Those requirements should ensure that direct discharges from certain industrial sectors are subject to secondary, tertiary and quaternary treatment as necessary for the protection of human health and the environment, *and that, in the final analysis, the parameters set for treated wastewaters are respected or the same level of environmental protection is ensured.*

(34) According to Article 168(1) TFEU, Union action complements national policies and is to be directed towards improving public health and preventing diseases. In order to ensure optimal use of relevant public health data from urban wastewaters, urban wastewater surveillance should be set up and used for preventive or early warning purposes, for instance in the detection of specific viruses in urban wastewater as a signal of the emergence of epidemics or pandemics. Member States should establish a **■** dialogue and coordination between competent authorities responsible for public health and competent authorities responsible for urban wastewater management. In the context of that coordination, ***clear allocation of the roles and responsibilities and costs among those competent authorities should be determined. Member States should develop*** a list of parameters relevant for public health to be monitored in urban wastewaters **■** as well as the frequency and location of the sampling ***taking into account the recommendations of the European Center of Disease Prevention and Control (ECDC), by the Health Emergency Preparedness and Response Authority (HERA) and the World Health Organisation (WHO) among others and consider the following health parameters for inclusion in such a list: SARS-CoV-2 and its variants, poliovirus, influenza virus, emerging pathogens and any other public health parameters that may be considered relevant.*** Based on information gathered during the COVID-19 pandemic and experience gained from the implementation of the Commission Recommendation on a common approach to establish a systematic surveillance of SARS-CoV-2 and its variants in wastewaters in the EU (the ‘recommendation’), ***in case of a health emergency, Member States should required to monitor relevant health parameters in urban wastewater.*** In order to ensure that harmonised methods are used, Member States should, to the extent possible, use sampling and analysis methods set out in the recommendation for the monitoring of SARS-CoV-2 and its variants.

- (35) The Union recognises the importance of tackling the issue of antimicrobial resistance (AMR) and adopted in 2017 the European One Health Action Plan against AMR²⁴. According to the World Health Organisation (WHO), wastewater is recognised and documented as major sources of antimicrobial agents and their metabolites, as well as antimicrobial-resistant bacteria and their genes. In order to increase the knowledge on the main sources of AMR, it is necessary to introduce a monitoring obligation for the presence of AMR in urban wastewaters to further develop our scientific knowledge and potentially take adequate action in the future.
- (36) *This Directive acknowledges the ‘One Health’ approach, as recognised by the World Health Organization, to be an integrated and unifying approach that aims to sustainably balance and optimise the health of people, animals and ecosystems. The ‘One Health’ approach recognises that the health of humans, domestic and wild animals, plants, and the wider environment, including ecosystems, are closely interlinked and interdependent.*

²⁴ Communication from the Commission to the Council and the European Parliament: A European One Health Action Plan against Antimicrobial Resistance (AMR) (COM/2017/0339 final).

- (37) In order to protect the environment and human health, Member States should identify the risks caused by urban wastewaters management. ***A broad chemical screening including chemical mixtures, and/or biological effect-based methods, to identify substances that cause concern including for aquatic life, drinking or bathing water quality can be part of the risk assessment.*** On the basis of that identification, and where necessary to comply with the requirements of the Union water legislation, Member States should take more stringent measures for the urban wastewater collection and treatment than the measures required to comply with the minimum requirements set out in this Directive. ***In line with Article 191(2) of the Treaty on the Functioning of the European Union and in addition to the measures provided for or taken in accordance with Article 11(3) of Directive 2000/60/EC, Member States should promote in priority control at source to prevent pollution from urban wastewater of receiving water bodies. In particular, Member States should take preventive measures to limit the possibilities that intentionally and unintentionally released micro-plastics reach urban wastewater and sludge.***
- (38) ***Depending on the situation, those more stringent measures can include, inter alia, the establishment of collecting systems, the development of integrated urban wastewater management plans or the application of secondary, tertiary or quaternary treatment to urban wastewater for agglomerations or urban wastewater treatment plants that do not reach the p.e. thresholds triggering the application of the standard requirements. They can also include more advanced treatment than the treatment necessary to respect the minimum requirements or disinfection of treated urban wastewaters necessary to comply with Directive 2006/7/EC of the European Parliament and of the Council²⁵.***

²⁵ ***Directive 2006/7/EC of the European Parliament and of the Council of 15 February 2006 concerning the management of bathing water quality and repealing Directive 76/160/EEC (OJ L 64, 4.3.2006, p. 37).***

- (39) Sustainable Development Goal 6 and the associated target requiring Member States to ‘achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations’ by 2030²⁶. ***Sanitation facilities should allow the safe management and disposal of human urine, faeces and menstrual blood and changing of menstrual products.*** Furthermore, Principle 20 of the European Pillar of Social Rights²⁷ states that everyone has the right to access essential services of good quality, including water and sanitation. Against that background, and in accordance with the recommendations in the WHO Guidelines for Sanitation and Health²⁸ and the provisions of the Protocol on Water and Health²⁹ Member States should tackle the issue of access to sanitation at national level. That should be done through actions ***ensuring*** access to sanitation for all, for example by setting up sanitation facilities in public spaces, as well as by encouraging the availability of appropriate sanitation facilities in public administrations and public buildings free of charge ***or*** making them affordable to all, ***including all kind of facilities and services, such as flush and dry toilets.*** They should be safely managed, which implies that they should be accessible to all ***where appropriate*** at all times, including for people with particular needs, such as children, older persons, persons with disabilities and homeless people, that they should be placed in a location that ensures ***maximum*** safety of users, and that they should be hygienically and technically safe to use. Such facilities should also be sufficient in number to ensure that the needs of people are met and waiting times are not unreasonably long. ***The sufficient number of sanitation facilities in public spaces should be decided at appropriate level, taking into account the principle of subsidiarity.***

²⁶ ***Resolution adopted by the United Nations General Assembly on 25 September 2015 (A/70/L.1).***

²⁷ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions Establishing a European Pillar of Social Rights (COM/2017/0250 final).

²⁸ WHO Guidelines on Sanitation and Health, 2018.

²⁹ Protocol on Water and Health to the 1992 Convention on the Protection and Use of Transboundary Watercourses and International Lakes, 17 June 1999.

(40) The specific situation of minority cultures, such as Roma and Travellers, whether settled or not, and in particular their lack of access to sanitation, was acknowledged in the Communication from the Commission of 7 October 2020 ‘A Union of Equality: EU Roma strategic framework for equality, inclusion and participation’, which calls for increasing effective equal access to essential services. Overall, it is appropriate that Member States pay particular attention to vulnerable **groups or groups that are marginalised due to factors related to their socio-economic situation, ethnicity, sexuality, gender, disability, homelessness, legal status, religious conviction or other reasons** by taking the necessary measures to **ensure** access to sanitation for those groups. It is important that the identification of those groups is coherent with Article 16(1) of Directive (EU) 2020/2184 of the European Parliament and of the Council³⁰. Measures to improve access to sanitation by vulnerable and marginalised groups might include providing sanitation facilities in public **and private** spaces for free or for a low service fee **as well as in public administration buildings**, improving or maintaining the connection to adequate systems to collect urban wastewater, and raising awareness of the nearest sanitation facilities.

³⁰ Directive (EU) 2020/2184 of the European Parliament and of the Council of 16 December 2020 on the quality of water intended for human consumption (OJ L 435, 23.12.2020, p. 1).

(41) According to the EU Human Rights Guidelines on Safe Drinking Water and Sanitation³¹, particular attention should be given to the needs of women and girls, as they are particularly at risk and exposed to attacks, sexual and gender-based violence, harassment and other threats to their safety when accessing sanitation facilities outside their homes. This is in line with the Council Conclusions on Water Diplomacy³², which reaffirm the importance of integrating a gender perspective into water diplomacy. Therefore, Member States should pay particular attention to women and girls as being a vulnerable group and should take the necessary measures to improve or maintain a safe access to sanitation for them.

³¹ EU Human Rights Guidelines on Safe Drinking Water and Sanitation (10145/19).
³² Council Conclusions on Water Diplomacy (13991/18).

- (42) The evaluation concluded that sludge management could be improved to better align it with the principles of the circular economy and of the waste hierarchy as defined in Article 4 of Directive 2008/98/EC *of the European Parliament and of the Council*³³. The actions to better monitor and reduce pollution at source from non-domestic discharges will help improving the quality of the sludge produced and ensure its safe use in agriculture. In order to ensure a proper and safe recovery of nutrients, including the critical substance phosphorus, from the sludge, **a minimum combined reuse and recycling rate** should be defined at Union level **giving Member States the flexibility to choose whether to reuse and/or to recycle the urban wastewater and/or sludge to recover phosphorus. This combined minimum reuse and recycling rate should take into account the phosphorus contents in sludge which can vary from one area to another. It should also take into account the level of saturation of each national market, e.g. the availability other sources of phosphorus from organic sources, for instance from livestock farming, and the possibilities of its absorption. Member States should be encouraged to monitor micro-pollutants in sludge, particularly where there is a risk of accumulation of micro-pollutants in sludge, and when it is reused in agriculture to increase the knowledge on its presence and to protect human health and the environment. The proper and safe recovery of nutrients and their reuse in agriculture should be encouraged to support the resilience and sustainability of the agricultural sector and contribute to the strategic autonomy of the EU fertiliser industry. In that context Member States should, while taking into account national and local valorisation options, take measures to encourage the production and purchasing of recovered nutrients from urban wastewater and sludge. When re-using sludge in agriculture particular attention should be paid to micro-plastics. In that sense micro-plastics should be systematically monitored when sludge is reused in agriculture. This information is indispensable for the safe management of sludge in agriculture and any possible review of relevant EU policy.**

³³ Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste and repealing certain Directives (OJ L 312, 22.11.2008, p. 3).

- (43) ***Adequate*** monitoring is necessary to verify compliance with the new requirements concerning ***micropollutants***, non-domestic pollution, energy neutrality, storm water overflows and urban runoff. ***Monitoring should be supported, where technically feasible and appropriate, through the use of digital tools. In particular for the operational management of collecting systems and urban wastewater treatment plants use of digital tools should be systematically considered.*** To verify the ***compliance*** of the quaternary treatment concerning the reduction of ***micropollutants*** in urban wastewater discharges, it is sufficient to monitor a limited set of representative ***micropollutants***. The monitoring frequencies should be ***built on*** the current best practices, as currently practiced in Switzerland. To remain cost-effective, those obligations should be adapted to the size of the urban wastewater treatment plants and of the agglomerations. The monitoring will also contribute to provide data for the overall Environmental Monitoring Framework as set up under the 8th Environmental Action Programme³⁴, and more specifically feed the Zero Pollution Monitoring Framework underpinning it³⁵.
- (44) ***Microplastics and relevant micropollutants should be monitored, where relevant, in storm water overflow discharges and in discharges of urban runoff from separate systems with a representative sampling programme allowing for concentration estimation in view of water quality modelling. GHG emissions should be monitored, where relevant, supported by calculations and modelling.***

³⁴ Decision (EU) 2022/591 of the European Parliament and of the Council of 6 April 2022 on a General Union Environment Action Programme to 2030 (OJ L 114, 12.4.2022, p. 22).

³⁵ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, Pathway to a Healthy Planet for All EU Action Plan: ‘Towards Zero Pollution for Air, Water and Soil’ (COM/2021/400 final).

(45) *To ensure the protection of the environment and that adequate action is taken under any risk assessment to be carried out for the implementation of this Directive as well as for the implementation of other Union legislation, Member States should monitor a broad spectrum of pollutants at the inlets and outlets of the urban wastewater treatment plants. To avoid unnecessary burden, only pollutants that can be expected to be found in urban wastewater should be monitored taking into account the high variety of pollutants which could reach urban wastewater treatment plants, including from non-domestic wastewater sources. Member States should have the possibility to reduce the monitoring frequency if pollutants are not found in subsequent sampling campaigns. More specifically recent data shows that PFAS are found in urban wastewater, sometimes at high concentrations. The most recent scientific evidence shows that PFAS is a concern to public health and the environment due to their persistence. It is therefore essential to better understand the pathways of PFAS into the environment and to monitor them in the inlet and outlet of the urban wastewater treatment plants. This monitoring should start in the first instance where the discharges reach catchment areas used for the abstraction of drinking water, due to high risks of being exposed to PFAS and their impact on health.*

- (46) In order to reduce administrative burden and better use the possibilities offered by digitalisation, the reporting on the implementation of the Directive should be improved and simplified by removing the obligation for Member States to report every two years to the Commission and for the Commission to publish bi-yearly reports. It should be replaced by a requirement for Member States to improve, with the support of the European Environment Agency (EEA), the existing national standardised data sets established under Directive 91/271/EEC, and to regularly update *them. These data sets will be used by the Commission to verify compliance with this Directive. The reporting model would be developed by the EEA in collaboration with Member States.* Access to the national databases should be provided to the Commission and the EEA. In order to ensure complete information on the application of this Directive, the data sets should include information on compliance of urban wastewater treatment plants with the treatment requirements (pass/fail, loads and concentration of pollutants discharged), on the level of achievement of the objectives of energy neutrality, on GHG emissions of the treatment plants above 10 000 p.e. and on measures taken by the Member States in the context of storm water overflows/ urban runoff, access to sanitation and treatment by individual systems. Moreover, full coherence with Regulation (EC) No 166/2006 of the European Parliament and of the Council³⁶ should be ensured to optimise the use of the data, as well as to support full transparency. *The information collected through this data set should support a comparison and an exchange of best practices at Union level of performance of urban wastewater treatment plants. The administrative burden of providing information and data to the public should at all times respect the principle of proportionality.*

³⁶ Regulation (EC) No 166/2006 of the European Parliament and of the Council of 18 January 2006 concerning the establishment of a European Pollutant Release and Transfer Register and amending Council Directives 91/689/EEC and 96/61/EC (OJ L 33, 4.2.2006, p. 1).

(47) *The implementation of the Directive is financed through water tariffs and public budgets, including European funding. In the future, the Extended Producer Responsibility should ensure that the costs of the quaternary treatment are at least partially borne by the concerned industries and complemented by other types of financing. In the past, the implementation of the Directive was also substantially supported by the Union's Cohesion Policy and programmes under Horizon 2020 and LIFE.* In order to ensure a timely and proper implementation of this Directive, it is essential that Member States establish a national implementation programme including long-term programming of the required investments accompanied with a financing strategy. Those national programmes should be reported to the Commission. To limit administrative burden, that requirement should not apply to Member States *in which more than 95 % of the agglomerations are compliant with Articles 3 to 8.* To continue the adequate implementation of the Directive, the Commission should consider the national implementation programmes reported by Member States for the preparation of the next multiannual financial framework post 2027 and those following thereafter and the Member States should put in place the required system of producer responsibility without delay.

- (48) The urban wastewater collection and treatment sector is specific, operating as a captive market, with public and small enterprises being connected to the collecting system without having the possibility to choose their operators. It is therefore important to ensure public access to operators' key performance indicators, such as the level of treatment achieved, the costs of treatment, the energy used and produced, and the related GHG emissions and carbon footprint. In order to make the public more aware of the implications of urban wastewater treatment, key information on the annual wastewater collection and treatment costs for each household should be provided, ***at least in agglomerations above 10 000 p.e., and preferably above 1 000 p.e.***, in an easily accessible manner, for instance on the invoices, while other detailed information should be accessible ***in a user-friendly format*** online, on a website of the operator or the competent authority.
- (49) Directive 2003/4/EC of the European Parliament and of the Council³⁷ guarantees the right of access to environmental information in the Member States in line with the 1998 Aarhus Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters (the 'Aarhus Convention'). The Aarhus Convention encompasses broad obligations related both to making environmental information available upon request and actively disseminating such information. It is important that the provisions of this Directive related to access to information and data-sharing arrangements complement that Directive, by establishing the obligation to make available to the public online information on the collection and treatment of urban wastewater in a user-friendly manner, without creating a separate legal regime.

³⁷ Directive 2003/4/EC of the European Parliament and of the Council of 28 January 2003 on public access to environmental information and repealing Council Directive 90/313/EEC (OJ L 41, 14.2.2003, p. 26).

(50) The effectiveness of this Directive and its aim of protecting public health in the context of the Union's environment policy require that natural or legal persons, or where appropriate their duly constituted organisations, be able to rely on it in legal proceedings and that the national courts be able to take this Directive into consideration as an element of Union law in order, inter alia, to review decisions of a national authority where appropriate. In addition, according to settled case law of the Court of Justice, under the principle of sincere cooperation laid down in Article 4(3) of the Treaty on European Union (TEU), it is for the courts of the Member States to ensure judicial protection of a person's rights under Union law. Furthermore, Article 19(1) TEU requires Member States to provide remedies sufficient to ensure effective judicial protection in the fields covered by Union law. ***This should be done according to national rules, without depriving the provision on compensation of its practical effect.*** In addition, in accordance with the Aarhus Convention, members of the public concerned should have access to justice in order to contribute to the protection of the right to live in an environment which is adequate for personal health and well-being.

(51) To adapt this Directive to scientific and technical progress, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of amending certain parts of the Annexes with regard to the *adaptation of monitoring to state of the art methods for monitoring, also with a view of making optimal use of digital tools and taking into account the relevant methods used in other relevant Union legislation, and evaluation of results for the* requirements for the secondary, tertiary and quaternary treatment, and the requirements for specific authorisations for discharges of non-domestic wastewater into collecting systems and urban wastewater treatment plants and in respect of supplementing this *Directive by specifying* minimum *combined* reuse and recycling *rate* for phosphorus *from sludge and from urban wastewater taking into account available technologies and resources as well as the economic viability for phosphorous recovery*. It is of particular importance that the Commission carries out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement on Better Law-Making. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

(52) In order to ensure uniform conditions for the implementation of this Directive, implementing powers should be conferred on the Commission for the adoption of standards for the design of individual systems, for the adoption of monitoring and assessment methods for the indicators of the quaternary treatment ***and the objectives regarding energy neutrality***, for the establishment of common conditions and criteria for the application of the exoneration for certain products from extended producer responsibility, for establishing methodologies to support the development of integrated urban wastewater management plans, ***for the development of alternative indicators to load-based indicative objective of pollution reduction based for instance on volume, number of occurrence of sewer overflows, volume of the discharged urban runoff, or other relevant alternative indicators, and for establishing methodologies*** to measure antimicrobial resistance, ***direct and indirect greenhouse gas emissions and microplastics*** in urban wastewater ***and sludge, for the establishment of a minimum list of relevant pollutants likely to be found in urban wastewaters including a methodology for identifying relevant pollutants likely to be found and criteria for revising the exclusion of some pollutants to be monitored, for the establishment of a harmonised methodology for measuring ‘PFAS Total’ and ‘Sum of PFAS’ in urban wastewater*** and for the adoption of the format of, and modalities for, presenting the information to be provided by Member States and compiled by the EEA on the implementation of this Directive. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council³⁸.

³⁸ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission’s exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

(53) Member States should lay down rules on penalties applicable to infringements of national provisions adopted pursuant to this Directive and should take all measures necessary to ensure that they are implemented. The penalties should be effective, proportionate and dissuasive, *and should, as applicable, take into account the financial situation of the natural or legal person held responsible.*

(54) Pursuant to the Interinstitutional Agreement on Better Law-Making³⁹, the Commission should carry out an evaluation of this Directive within a certain period of time from the date set for its transposition. That evaluation should be based on experience gained and data collected during the implementation of this Directive, on any available WHO recommendations, and on relevant scientific, analytical, and epidemiological data. In the evaluation, particular attention should be given to ***an analysis of the adequacy of the public health parameters used in urban wastewater surveillance, an analysis of the added values of a mandatory monitoring of public health parameters, an analysis of the possible necessity to adapt the list of products to be covered by extended producer responsibility schemes including the conditions for exonerations, an analysis of the possible impacts on the functioning of the internal market of the potentially different contribution rates for producers set by Member States, an analysis of the feasibility and appropriateness of the development of an Extended Producer Responsibility system for products generating Per- and Polyfluoroalkyl Substances (PFAS) and microplastics, an analysis of the added value and the appropriateness of requiring mandatory national water reuse plans including national targets and measures, evaluate the objective of energy neutrality in order to analyse the technical and economic feasibility and environmental and climate benefits to achieve a higher energy autonomy of the sector, an evaluation of the possibilities for measuring direct and indirect greenhouse gas emissions emitted from the urban wastewater sector, an evaluation of the possibility and the time required to reach climate neutrality of the urban wastewater treatment sector, the opportunity and feasibility to set Union minimum reuse and recycling rates for nitrogen from sludge and/or from urban wastewater.***

³⁹ Interinstitutional Agreement between the European Parliament, the Council of the European Union and the European Commission on Better Law-Making (OJ L 123, 12.5.2016, p. 1).

- (55) Directive 91/271/EEC provides for specific deadlines for Mayotte due to its inclusion in 2014 as an outermost region within the meaning of Article 349 of the Treaty on the Functioning of the European Union. Therefore, the application of the obligations to establish collecting systems and apply secondary treatment to urban wastewater from agglomeration of 2 000 p.e. and above should be deferred with respect to Mayotte.
- (56) *It is appropriate to consider the specific situation of Mayotte and the other Union's outermost regions, as listed in Article 349 of the TFEU, which provides for specific measures to support those regions. In terms of urban wastewater treatment of these territories, special attention should be given to the difficult topography and insularity.*
- (57) In order to ensure the continuity of the protection of the environment, it is important that Member States maintain at least the current level of tertiary treatment until the new requirements for the reduction of phosphorus and nitrogen become applicable. Therefore, Article 5 of Council Directive 91/271/EC should continue to apply until those new requirements become applicable.

- (58) Since the objectives of this Directive, namely to protect the environment and public health, to progress towards climate neutrality of urban wastewater collection and treatment activities, to improve access to sanitation and to ensure a regular surveillance of parameters relevant to public health, cannot be sufficiently achieved by the Member States but can rather, by reason of the scale and effects of the action, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 TEU. In accordance with the principle of proportionality as set out in that Article, this Directive does not go beyond what is necessary in order to achieve those objectives.
- (59) The obligation to transpose this Directive into national law should be confined to those provisions which represent a substantive amendment as compared to the earlier Directive. The obligation to transpose the provisions which are unchanged arises under the earlier Directive.
- (60) This Directive should be without prejudice to the obligations of the Member States relating to the time-limits for the transposition into national law of the Directives set out in Annex VII, Part B,

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Subject matter

This Directive lays down rules on the collection, treatment, and discharge of urban wastewater **■**, to protect the environment and human health, ***in line with the One Health approach***, while progressively ***reducing*** greenhouse gas emissions ***to sustainable levels***, improving the energy balance of urban wastewater collection and treatment activities ***and contributing to the transition towards a circular economy***. It also lays down rules on access to sanitation ***for all***, on transparency of the urban wastewater sector, on the regular surveillance of public health relevant parameters in urban wastewaters ***and on the implementation of the polluter-pay principle***.

Article 2

Definitions

For the purpose of this Directive, the following definitions apply:

- (1) 'urban wastewater' means ***any of the following***:
 - (a) ***domestic wastewater***;
 - (b) ***the mixture of domestic wastewater and non-domestic wastewater***;
 - (c) ***the mixture of domestic wastewater and urban runoff***;
 - (d) ***the mixture of domestic wastewater, non-domestic wastewater and urban runoff***;

- (2) ‘domestic *wastewater*’ means wastewater from residential settlements, *services and institutions* which originates predominantly from the human metabolism *and/or* from household activities;
- (3) ‘non-domestic wastewater ■’ means *wastewater, other than domestic wastewater and urban runoff*, which is discharged ■ from premises used for ■ the exercise of a trade *or* industrial *or economical* activities;
-
- (4) ‘agglomeration’ means an area where the *population (expressed in population equivalent), combined or not with economic activities is sufficiently concentrated* for urban wastewater to be collected and conducted to *one or more* urban wastewater treatment *plants and/or to one or more* final discharge *points*;
- (5) ‘urban runoff’ means *precipitation* from agglomerations collected by combined or separate sewers;
- (6) ‘storm water overflow’ means discharge of untreated urban wastewater *into* receiving waters from combined sewers caused by *precipitation or system failures*;
- (7) ‘collecting system’ means a system of conduits which collects and conducts urban wastewater;

- (8) 'combined sewer' means a **single** conduit that collects and conducts urban wastewater **including urban runoff**;
- (9) 'separate sewer' means a conduit that separately collects and conducts either of the following:
- (a) domestic wastewater;
 - (b) non-domestic wastewater;
 - (c) a mixture of domestic and non-domestic wastewater;
 - (d) **urban runoff**;
- (10) '1 population equivalent' or '(1 p.e.)' means the **organic biodegradable load** per day having a five-day biochemical oxygen demand (BOD5) of 60 g of oxygen per day;
- (11) '**primary treatment**' means **treatment of urban wastewater by a physical and/or chemical process involving settlement of suspended solids, or other processes in which the BOD5 of the incoming wastewater is reduced by at least 20 % before discharge and the total suspended solids of the incoming wastewater are reduced by at least 50 %**;
- (12) 'secondary treatment' means treatment of urban wastewater by a process generally involving biological treatment with a secondary settlement or **another process which reduces biodegradable organic matter from urban wastewater**;

- (13) ‘tertiary treatment’ means treatment of urban wastewater by a process which *reduces* nitrogen *and/or* phosphorus from urban wastewaters;
- (14) ‘quaternary treatment’ means treatment of urban wastewater by a process which *reduces* a broad spectrum of *micropollutants from* urban wastewaters;
- (15) ‘sludge’ means *organic and inorganic residue* resulting from the treatment of urban wastewater *from an urban wastewater treatment plant (excluding grit, grease, other debris and any other screenings and residues from the pre-treatment step)*;
- (16) ‘eutrophication’ means the enrichment of water by nutrients, especially compounds of nitrogen and/or phosphorus, causing an accelerated growth of algae and higher forms of plant life to produce an undesirable disturbance to the balance of organisms present in the water and to the quality of the water concerned;
- (17) ‘micro-pollutant’ means a substance *as defined in Article 3(1) of Regulation (EC) No 1907/2006 of the European Parliament and of the Council*⁴⁰, including its breakdown products, that is usually present in the *aquatic* environment, urban *wastewater and/or sludge* and which can be considered hazardous to human health or the environment based on *the relevant* criteria set out in Part 3 and Part 4 of Annex I to Regulation (EC) *No 1272/2008 even in low concentrations*;
- (18) ‘dilution ratio’ means the ratio *of the last five years average* of annual flow of the receiving waters at the point of discharge *to the last five years average of* the annual *discharge* volume of urban wastewater *into surface waters*;

⁴⁰ Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC (OJ L 396, 30.12.2006, p. 1).

- (19) ‘producer’ means any manufacturer, importer or distributor that on a professional basis places products on the market of a Member State, including by means of distance contracts as defined in Article 2(7) of Directive 2011/83/EU *of the European Parliament and of the Council*⁴¹ means;
- (20) ‘Producer Responsibility Organisation’ means *a nationally recognised* organisation established *to enable* producers *to fulfil* their obligations under *Articles 9 and 10*;
- (21) ‘sanitation’ means facilities and services for the safe, *hygienic, secure, and socially and culturally acceptable management and* disposal of human urine *and* faeces, and *for the changing and disposal of* menstrual products, *that provide privacy and ensures dignity*;
- (22) ‘antimicrobial resistance’ means the ability of micro-organisms to survive or to grow in the presence of a concentration of an antimicrobial agent which is usually sufficient to inhibit or kill micro-organisms of the same species;
- (23) ‘One Health’ means *One Health as defined in Article 3, point (7), of Regulation (EU) 2022/2371 of the European Parliament and of the Council*⁴²;

⁴¹ Directive 2011/83/EU of the European Parliament and of the Council of 25 October 2011 on consumer rights, amending Council Directive 93/13/EEC and Directive 1999/44/EC of the European Parliament and of the Council and repealing Council Directive 85/577/EEC and Directive 97/7/EC of the European Parliament and of the Council (OJ L 304, 22.11.2011, p. 64).

⁴² *Regulation (EU) 2022/2371 of the European Parliament and of the Council of 23 November 2022 on serious cross-border threats to health and repealing Decision No 1082/2013/EU (OJ L 314, 6.12.2022, p. 26).*

- (24) ‘public concerned’ means the public affected or likely to be affected by, or having an interest in, the ***taking of a decision*** for the implementation of the obligations laid down in ***Articles 6, 7 or 8*** of this Directive; ***for the purposes of this definition***, non-governmental organisations promoting the protection of human health or the environment ***and meeting any requirements under national law shall be deemed to have an interest***;
- (25) ‘**■** biomedica’ means ***any support, usually made of plastic***, used for the development of the bacteria needed for the treatment of urban wastewaters;
- (26) ‘placing on the market’ means the first making available of a product on the market of a Member State;
- (27) ‘load’ means ***the amount of organic biodegradable matter measured as BOD5 in urban wastewater, expressed in p.e., or any pollutant or nutrient, expressed in mass unit per time***;
- (28) ‘individual system’ means ***a sanitation facility that collects, stores, treats and/or disposes of domestic wastewater, from buildings or parts of buildings not connected to a urban wastewater collecting system.***

Article 3

Collecting systems *and calculation of the load expressed in p.e.*

1. Member States shall ensure that all agglomerations *of 2 000 p.e.* and above comply with the following requirements:
 - (a) they are provided with collecting systems;
 - (b) all their sources of domestic wastewater are connected to the collecting system.
2. **█** Member States shall ensure that agglomerations *between 1 000 and 2 000 p.e.* *comply with the requirements of paragraph 1 by 31 December 2035.*

█
Member States may derogate from the deadline referred to in this paragraph for a maximum period of:

- (i) *8 years when on ... [day of entry into force of the Directive]*
 - *less than 50 % of these agglomerations are provided with collecting systems; or*
 - *less than 50 % of the urban wastewater load of these agglomerations is collected in collecting systems;*

(ii) 10 years when on ... [day of entry into force of the Directive],

- less than 25 % of these agglomerations are provided with collecting systems; or***
- less than 25 % of the urban wastewater load of these agglomerations is collected in collecting systems.***

Croatia, Bulgaria and Romania may derogate from the deadline referred to in this paragraph for a maximum period of:

(i) 12 years when on ... [day of entry into force of the Directive],

- less than 50 % of these agglomerations are provided with collecting systems; or***
- less than 50 % of the urban wastewater load of these agglomerations is collected in collecting systems;***

- (ii) 14 years when on ... [day of entry into force of the Directive],**
- less than 25 % of these agglomerations are provided with collecting systems; or**
 - less than 25 % of the urban wastewater load of these agglomerations is collected in collecting systems.**

When Member States derogate from the deadline referred to in this paragraph, they shall ensure that their first national implementation programme referred to in Article 23 includes:

- (i) the number of agglomerations between 1 000 and 2 000 p.e. that lack complete collecting system ... [day of entry into force of the Directive]; and**
- (ii) a plan detailing the necessary investments to reach full compliance for these agglomerations within the extended deadlines; and**

(iii) the technical or economic reasons justifying the extension of the deadlines referred to in this paragraph.

The extensions of the deadline referred to in this paragraph shall be effective only if the conditions of the first subparagraph are fulfilled. The Commission shall notify the Member States if these conditions are not fulfilled by ... [the last day of the sixth month after the deadline referred to in Article 23(2)].

3. *The load of an agglomeration expressed in p.e. shall be calculated on the basis of the maximum average weekly load generated in that agglomeration during the year, excluding unusual weather situations such as those due to heavy rain.*
4. Collecting systems shall fulfil the requirements of Part A of Annex I.

█

Article 4

Individual systems

1. ***Member States may derogate*** from Article 3 ***only if*** the establishment of a collecting system ***or the connection to a collecting system*** is not justified either because it would produce no environmental ***or human health*** benefit, ***or it is not technically feasible***, or because it would involve excessive cost. ***If derogating from Article 3***, Member States shall ensure that individual systems for the ***collection, storage and/or when applicable***, treatment of urban wastewaters ***are used in agglomerations of 1 000 p.e. and above, or part of these agglomerations***.
2. Member States shall ensure that ***the*** individual systems ***referred to in paragraph 1*** are designed, operated and maintained in a manner that ***achieves*** the same level of ***human health and environmental protection*** as the secondary and tertiary treatments referred to in Articles 6 and 7.
3. Member States shall ensure that ***individual systems that are used in*** agglomerations ***of 1 000 p.e. and above*** are registered in a registry and that regular inspections ***or other means of regular checks or control*** of those systems, ***on the basis of a risk-based approach***, are carried out by the ***competent authority or other body authorised at national, regional or local level***.

4. The Commission is empowered to adopt *implementing acts to ensure uniform application of* this Directive by *specifying* minimum requirements *for*:
- (a) *the design, operation, and maintenance of individual systems referred to in paragraphs 1 and 2; and*
 - (b) *the regular inspections referred to in paragraph 3, including the establishment of a minimum frequency of such inspections depending on the type of individual systems, and based on a risk-based approach.*

Those implementing acts shall be adopted by ... [36 months from the entry into force of this Directive] in accordance with the examination procedure referred to in Article 28(2).

The requirements related to design referred to in paragraphs 2 and 4 shall not apply to individual systems referred to in paragraph 1 which were established before the date of entry into force of this Directive.

5. Member States that use individual systems to *collect and/or* treat more than 2 % of the urban wastewater load *at national level* from agglomerations of 2 000 p.e. and above shall provide the Commission with a justification for the use of individual systems ■ . That justification shall:
- (a) demonstrate that the conditions for using individual systems set out in paragraph 1 are fulfilled;
 - (b) describe the measures taken in accordance with paragraphs 2 *and* 3;
 - (c) demonstrate compliance with the minimum requirements referred to in paragraph 4 where the Commission has exercised its *implementing* power under that paragraph;
 - (d) *demonstrate that the use of the individual system does not prevent Member States to comply with the environmental objectives established in Article 4 of Directive 2000/60/EC.*
6. The Commission is empowered to adopt implementing acts establishing the format for submitting the information referred to in paragraph 5. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).

Article 5

Integrated urban wastewater management plans

1. By 31 December **2033**, Member States shall ensure that an integrated urban wastewater management plan is established for ***drainage areas of*** agglomerations of 100 000 p.e. and above.
2. ***At the latest six months after the next update of the River Basin Management Plan made pursuant to Article 13(7) of Directive 2000/60/EC following the adoption of this Directive or by 22 June 2028***, Member States shall establish a list of agglomerations of between 10 000 p.e. and 100 000 p.e. where, considering historic data, ***modelling*** and state-of-the-art climate projections, ***including seasonal variations, as well as the pressures and the assessment of impacts undertaken under the River Basin Management Plan***, one or more of the following conditions apply:
 - (a) storm water overflow **■** poses a risk to the environment or human health;
 - (b) storm water overflow represents more than **2 %** of the annual collected urban wastewater load ***of the parameters referred to in Table 1 and, where relevant, Table 2 of Annex I***, calculated in dry weather ***flow***;

- (c) storm water overflow ■ prevents the fulfilment of any of the following:
- (i) the requirements established under Article 5 of Directive (EU) 2020/2184;
 - (ii) the requirements set out in Article 5(3) of Directive 2006/7/EC;
 - (iii) the requirements set out in Article 3 of Directive 2008/105/EC of the European Parliament and of the Council⁴³;
 - (iv) the environmental objectives set out in Article 4 of Directive 2000/60/EC;
 - (v) *the requirements set out in Article 1 of Directive 2008/56/EC;*
 - (vi) *the requirements established under Article 3 of Directive 2006/118/EC of the European Parliament and of the Council⁴⁴;*

⁴³ Directive 2008/105/EC of the European Parliament and of the Council of 16 December 2008 on environmental quality standards in the field of water policy, amending and subsequently repealing Council Directives 82/176/EEC, 83/513/EEC, 84/156/EEC, 84/491/EEC, 86/280/EEC and amending Directive 2000/60/EC of the European Parliament and of the Council (OJ L 348, 24.12.2008, p. 84).

⁴⁴ ***Directive 2006/118/EC of the European Parliament and of the Council of 12 December 2006 on the protection of groundwater against pollution and deterioration (OJ L 372, 27.12.2006, p. 19).***

(d) relevant points in separate sewers have been identified where urban runoff is expected to be polluted in such a way that its discharge into receiving waters can be considered as a risk to the environment or human health or prevents the fulfilment of any of the Directives referred to in point (c).

Member States shall review the list referred to in the first subparagraph every *six* years after its establishment and update it where necessary.

3. By 31 December **2039**, Member States shall ensure that an integrated urban wastewater management plan is established for ***drainage areas of*** agglomerations referred to in paragraph 2.
4. Integrated urban wastewater management plans shall be made available to the Commission on request.
5. Integrated urban wastewater management plans shall include at least the elements set out in Annex V ***and prioritise green and blue infrastructure solutions wherever possible.***

6. The Commission is empowered to adopt implementing acts to ***ensure uniform application of this Article by specifying:***
- (a) ■ methodologies for the identification of the measures referred to in point 3 of Annex V;
 - (b) ■ methodologies for the determination of alternative indicators to verify whether the indicative objective of pollution reduction referred to in point 2 (a) of Annex V is achieved;
 - (c) ■ the format by which integrated urban wastewater management plans are to be made available to the Commission where requested in accordance with paragraph 4.

Those implementing acts shall be adopted ***by ... [36 months from the entry into force of this Directive] in accordance with the examination procedure referred to in Article 28(2).***

7. ***Member States shall ensure that integrated urban wastewater management plans are reviewed at least every six years after their establishment and updated where necessary. Following an update of the list referred to in paragraph 2, Member States shall ensure that integrated management plans are established for agglomerations within six years of their inclusion in that list.***

Article 6

Secondary treatment

1. ***Member States shall ensure that discharges from urban wastewater treatment plants serving agglomerations of 2 000 p.e. and above meet the relevant requirements for secondary treatment set out in Part B and Table 1 of Annex I in accordance with the methods for monitoring and evaluation of results laid down in Part C of Annex I before discharge into receiving waters. Without prejudice to the possibility of using alternative methods as referred to in point 1, Part C of Annex I, the maximum permitted number of samples which fail to conform to the parametric values of Table 1 of Part B of Annex I is set out in Table 4 of Part C of Annex I.***

For agglomerations of between 2 000 p.e. and 10 000 p.e. which are discharging into coastal waters as defined under Directive 2000/60/EC and which apply appropriate treatment in accordance with Article 7 of Council Directive 91/271/EEC on ... [the date of entry into force of this Directive], the obligation set out in the first paragraph shall not apply until ... [last day of the twelfth year after the entry into force of this Directive].

2. *For agglomerations discharging into less sensitive areas as referred to in Article 6(1) of Council Directive 91/271/EEC on ... [date if entry into force of this Directive], the obligations set out in the first paragraph shall apply on ... [last day of the twelfth year after the entry into force of this Directive].*
3. *Member States shall ensure that discharges from urban wastewater treatment plants serving agglomerations of between 1 000 p.e. and 2 000 p.e., by 31 December 2035 meet the relevant requirements for secondary treatment set out in Part B and Table 1 of Annex I in accordance with the methods for monitoring and evaluation of results laid down in Part C of Annex I before discharge into receiving waters. Without prejudice to the possibility of using alternative methods as referred to in point 1, Part C of Annex I, the maximum permitted number of samples which fail to conform to the parametric values of Table 1 of Part B of Annex I is set out in Table 4 of Part C of Annex I.*

Member States may derogate from the deadline referred to in this paragraph for a maximum period of:

(i) 8 years when on ... [day of entry into force of the Directive]:

- in less than 50 % of these agglomerations their discharges are not subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I; or*
- less than 50 % of the urban wastewater load of these agglomerations is subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I;*

(ii) 10 years when on ... [day of entry into force of the Directive]:

- in less than 25 % of these agglomerations their discharges are not subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I; or*
- in less than 25 % of the urban wastewater load of these agglomerations is subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I.*

Croatia, Bulgaria and Romania may derogate from the deadline referred to in this paragraph for a maximum period of:

- (i) 12 years when on ... [day of entry into force of the Directive],*
 - in less than 50 % of these agglomerations their discharges are not subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I; or*
 - less than 50 % of the urban wastewater load of these agglomerations is subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I;*
- (ii) 14 years when on ... [day of entry into force of the Directive]*
 - in less than 25 % of these agglomerations their discharges are not subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I; or*
 - in less than 25 % of the urban wastewater load of these agglomerations is subject to secondary treatment on their territory, in accordance with Part B and Table 1 of Annex I.*

When Member States derogate from the deadlines referred to in this paragraph, they shall ensure that their first national implementation programme referred to in Article 23 includes:

- (i) the number of agglomerations between 1 000 and 2 000 p.e. that lack secondary treatment ... [day of entry into force of the Directive]; and*
- (ii) a plan detailing the necessary investments to reach full compliance for these agglomerations within the extended deadlines; and*
- (iii) the technical or economic reasons justifying the extension of the deadlines referred to in this paragraph.*

The extensions of the deadlines referred to in this paragraph shall be effective only if the conditions of the first subparagraph are fulfilled. The Commission shall notify the Member States if these conditions are not fulfilled by ... [the last day of the sixth month after the deadline referred to in Article 23(2)].

4. *Urban wastewater discharges may be subject to treatment less stringent than that prescribed in paragraphs 1 and 3 until ... [last day of the twentieth year after the entry into force of the Directive] where they are discharged into:*
- (a) waters situated in high mountain regions (over 1 500 m above sea level) where it is difficult to apply an effective biological treatment due to low temperatures; or*

- (b) deep marine waters when it concerns a discharge of wastewater from agglomerations of less than 150 000 p.e. in less populated outermost regions in the meaning of Article 349 TFEU where the topography and geography of the territory makes it difficult to apply an effective biological treatment; or*
- (c) waters from small agglomerations between 1 000 and 2 000 p.e. situated in regions with a cold climate where it is difficult to apply an effective biological treatment due to low temperatures if the average quarterly water temperature of the inlet is below 6° C.*

The conditions to apply the first subparagraph are that Member States concerned provides the Commission with detailed studies demonstrating that such discharges do not adversely affect the environment and human health and they do not prevent the receiving waters to meet the relevant quality objectives and the relevant provisions of other relevant Union legislation.

5. The load expressed in p.e. shall be calculated on the basis of the maximum average weekly load entering the urban wastewater treatment plant during the year, excluding unusual *weather* situations *such as those* due to heavy rain.

Article 7

Tertiary treatment

1. By 31 December **2033**, Member States shall ensure that discharges from **30 %** of urban wastewater treatment plants treating a load of **150 000** p.e. and above and not applying tertiary treatment on ... [the date of entry into force of this Directive] ***meet the relevant requirements for tertiary treatment in accordance with Part B and Table 2 of Annex I before discharge into receiving waters.***

By 31 December 2036, Member States shall ensure that discharges from 70 % of urban wastewater treatment plants treating a load of 150 000 p.e. and above and not applying tertiary treatment on ... [the date of entry into force of this Directive] meet the relevant requirements for tertiary treatment in accordance with Part B and Table 2 of Annex I before discharge into receiving waters.

By 31 December **2039**, Member States shall ensure that all urban wastewater treatment plants treating a load of **150 000** p.e. and above ***meet the relevant requirements for tertiary treatment in Part B and Table 2 of Annex I before discharge into receiving waters.***

2. By 31 December **2027**, Member States shall establish ***and publish*** a list of areas on their territory that are sensitive to eutrophication, ***and shall include with that list information on whether they are phosphorus- and/or nitrogen-sensitive areas*** and update that list every **six** years starting on 31 December **2033**.

The list referred to in the first subparagraph shall include the areas identified in Annex II.

The requirement set out in the first subparagraph shall not apply where a Member State implements tertiary treatment in accordance with paragraph 5 in its entire territory.

3. Member States shall ensure that ***discharges from agglomerations of 10 000 p.e. and above meet the relevant requirements for tertiary treatment set out in Part B and Table 2 of Annex I*** before discharge into areas included in a list referred to in paragraph 2 ***by***:

(a) 31 December 2033 for 20 % of these agglomerations;

(b) 31 December 2036 for 40 % of these agglomerations;

(c) 31 December 2039 for 60 % of these agglomerations;

(d) 31 December 2045 for all of these agglomerations.

4. *Member States may derogate from the deadline referred to in point (d) of paragraph 3 for a maximum of eight years on the conditions that:*
- (i) at least 50 % of the concerned agglomerations are not applying tertiary treatment according to the requirements set out in Council Directive 91/271/EEC or do not meet the requirements of Table 2 as referred to in Annex I of this Directive on ... [day of entry into force of the Directive]; and*
 - (ii) the first national implementation programme submitted under Article 23(2) includes:*
 - the number of agglomerations referred to in paragraph 3 lacking tertiary treatment according to the requirements set out in Council Directive 91/271/EEC or not meeting the requirements of Table 2 as referred to in Annex I of this Directive on ... [day of entry into force of the Directive]; and*
 - a plan detailing the necessary investments to reach full compliance for these agglomerations within the extended deadline; and*
 - the technical or economic reasons justifying the extension of the deadline referred to in point (d) of paragraph 3.*

The extensions of the deadlines referred to in this paragraph shall be effective only if the conditions of the first subparagraph are fulfilled. The Commission shall notify the Member States if these conditions are not fulfilled by ... [the last day of the sixth month after the deadline referred to in Article 23(2)]. However, urban wastewater treatment plants treating a load of 150 000 p.e. and above shall still meet the deadlines set in paragraph 1.

5. *Discharges of urban wastewater referred to in paragraphs 1 and 3 shall meet the relevant requirements in Part B and Table 2 of Annex I in accordance with the methods for monitoring and evaluation of results laid down in Part C of Annex I. The annual mean of the samples for each parameter referred to in Table 2 of Annex I shall be conform to the relevant parametric values set out in that table.*
6. *For urban wastewater treatment plants that are in construction, under major refurbishment of their tertiary treatment or were commissioned after 31 December 2020 and before the date of entry into force of this Directive, the requirements relating to the nitrogen parameter set out in this Article shall apply at the latest five years later from the deadlines established in paragraphs 1 and 3.*

█

7. The Commission is empowered to adopt delegated acts in *what concerns tertiary treatment in* accordance with the procedure referred to in Article 27 to amend *Part C* of Annex I in order to adapt the **■** methods *for monitoring and evaluation of results* to technological and scientific progress.
8. By way of derogation from paragraphs 3 and 5, Member States may decide that an individual urban wastewater treatment plant situated in an area included in a list referred to in paragraph 2 shall not be subject to the requirements set out in paragraphs 3 and 5 where it can be shown that the minimum percentage of reduction of the overall load entering all urban *wastewater* treatment plants in that area is **■** :
 - (a) *at least 75 % for total phosphorus and at least 75 % for total nitrogen from the date of entry into force of this Directive;*
 - (b) 82,5 % for total phosphorus and 80 % for total nitrogen by 31 December **2039**;
 - (c) **87,5** % for total phosphorus and **82,5** % for total nitrogen by 31 December **2045**.
9. Discharges from urban **■** wastewater treatment plants of 10 000 p.e. and above into a catchment area of an area sensitive *to* eutrophication included in a list referred to in paragraph 2 shall *also* be subject to paragraphs 3, **5** and 8.

10. Member States shall ensure that discharges from urban wastewater treatment plants which are situated in an area included in a list referred to in paragraph 2 following one of the regular updates of the list required by that paragraph fulfil the requirements laid down in paragraphs 3 and 5 within seven years of the inclusion in that list **■** .
11. ***Where the number of urban wastewater treatment plants that needs to be upgraded to meet the objectives referred to in paragraphs 1 and 3 at national level is not an integer, the number of urban wastewater treatment plants shall be rounded to the nearest integer. In case of equidistance, the number shall be rounded down.***

Article 8

Quaternary treatment

1. **■** Member States shall ensure that discharges from urban wastewater treatment plants treating a load of *150 000* p.e. and above ***meet the relevant requirements for quaternary treatment of urban wastewater set out in Part B and Table 3 of Annex I*** in accordance with ***the methods of monitoring and evaluation of result laid down in Part C of Annex I before discharge into receiving waters by:***
 - (a) **■** 31 December 2033 ***for discharges from 20 % of these*** urban wastewater treatment plants;

- (b) 31 December 2039 for discharges from 60 % of these urban wastewater treatment plants;*
- (c) 31 December 2045 for all discharges from these urban wastewater treatment plants.*

The maximum permitted number of samples which fail to conform to the parametric values of Table 3 of Part B of Annex I is set out in Table 4 of Part C of Annex I.

2. On 31 December 2030, Member States shall have established a list **■** of areas on their national territory where the concentration or the accumulation of *micropollutants from urban wastewater treatment plants represent* a risk for human health or the environment. Member States shall review that list *in 2033, and* thereafter *every six years* and update it if necessary.

The list referred to in the first subparagraph shall include the following areas **■** :

- (a) catchment areas for abstraction points of water intended for human consumption as characterised in accordance with Article 8(2), point (a), of Directive (EU) 2020/2184 unless the risk assessment in accordance with Article 8(2), point (b), of that Directive indicates that the discharge of micropollutants from urban wastewater treatment plants does not constitute a potential risk that might cause deterioration of the water quality to the extent that it could constitute a risk to human health;*

- (b) bathing water falling within the scope of Directive 2006/7/EC *unless the bathing water profile referred to in Article 6 and Annex III of that Directive indicates that the discharge of micropollutants from urban wastewater does not affect bathing waters and impair bathers' health;*
- (c) *areas where aquaculture activities, as defined in Article 4, point (25), of Regulation (EU) No 1380/2013 of the European Parliament and of the Council⁴⁵, take place unless the competent national authorities are satisfied that the discharge of micropollutants from urban wastewater cannot affect the safety of the foodstuff in its finished form.*

The list referred to in the first subparagraph shall also include the following areas based on an assessment of the risks for human health or the environment that the discharge of micropollutants in urban wastewater poses on:

- (a) *lakes as defined in Article 2, point (5), of Directive 2000/60/EC;*

⁴⁵ Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC (OJ L 354, 28.12.2013, p. 22).

(b) rivers as defined in Article 2, point (4), of Directive 2000/60/EC or other water streams where the dilution ratio is below 10;

■

(c) areas where additional treatment is necessary to meet the requirements set out in Directives 2000/60/EC, 2006/118/EC and 2008/105/EC;

(d) *special areas of conservation as defined in Article 1, point (l), of Council Directive 92/43/EEC⁴⁶ and special protection areas classified under Article 4(1), fourth subparagraph, of Directive 2009/147/EC of the European Parliament and of the Council⁴⁷ constitutive of the Natura 2000 ecological network.*

(e) *coastal waters as defined in Article 2, point (7), of Directive 2000/60/EC;*

(f) *transitional waters as defined in Article 2, point (6), of Directive 2000/60/EC;*

(g) *marine waters as defined in Article 3, point (1), of Directive 2008/56/EC.*

The risk assessment referred to in the second subparagraph shall be communicated to the Commission on request.

■

⁴⁶ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7).

⁴⁷ Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (OJ L 20, 26.1.2010, p. 7).

3. The Commission is empowered to adopt implementing acts establishing the format of the risk assessment referred to in paragraph 2, second subparagraph, and the method to be used for that risk assessment. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).

■

4. ■ Member States shall ensure that *agglomerations of 10 000 p.e and above meet the requirements for quaternary treatment set out in Part B and Table 3 of Annex I accordance with the methods of monitoring and evaluation of result laid down in Part C of Annex I* before discharge into areas included in a list referred to in paragraph 2 *by*:

■

- (a) 31 December 2033 for 10% of these agglomerations;*
- (b) 31 December 2036 for 30 % of these agglomerations;*
- (c) 31 December 2039 for 60 % of these agglomerations;*
- (d) 31 December 2045 for 100% of these agglomerations.*

■ The maximum permitted number of samples which fail to conform to the parametric values of Table 3 of Part B of Annex I is set out in Table 4 of Part C of Annex I.

The Commission is empowered to adopt delegated acts in *what concerns quaternary treatment in* accordance with the procedure referred to in Article 27 to amend *Part C* of Annex I in order to adapt the **■** methods *for monitoring and evaluation of results* to technological and scientific progress.

5. *Member States shall ensure that discharges from urban wastewater treatment plants which are situated in an area included in a list referred to in paragraph 2 following one of the regular updates of the list required by that paragraph, fulfil the requirements laid down in paragraph 4 and in Part B and Table 3 of Annex I within seven years of the inclusion in that list, but not later than the deadlines set out in paragraph 4.*
6. **■** The Commission *may* adopt implementing acts to establish the monitoring and sampling methods to be used by the Member States to determine the presence and quantities in urban wastewater of the indicators set out in Table 3 of Annex I. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).
7. *Where the number of urban wastewater treatment plants that needs to be upgraded to meet the objectives referred to in the points (a) and (b) of the first subparagraph of this Article at national level is not an integer, the number of urban wastewater treatment plants shall be rounded to the nearest integer. In case of equidistance, the number shall be rounded down.*

8. ***Without prejudice to the other provisions under this Article, to ensure that the reuse of treated urban wastewater is safe for human health and the environment, Member States shall, where appropriate, treat the urban wastewater that is reused or foreseen to be reused in accordance with the requirements for quaternary treatment set out in Part B and Table 3 of Annex I. In case the treated urban wastewater is reused for agricultural purposes, the outcome of the risk assessments carried out under Regulation (EU) 2020/741 shall be taken into account.***

Article 9

Extended producer responsibility

1. Member States shall take measures to ensure that ***by ... [the last day of the third year from the date of entry into force of this Directive]***, producers who place any of the products listed in Annex III on the market have extended producer responsibility.

Such measures shall ensure that those producers cover:

- (a) ***at least 80 % of*** the full costs for complying with the requirements set out in Article 8, including the ***investments and the operational*** costs for the quaternary treatment of urban wastewater to remove ***micropollutants*** resulting from the products and their residues they place on the market, for the monitoring of ***micropollutants*** referred to in Article 21(1), point (a); ***and***

- (b) the costs for gathering and verifying data on products placed on the market; and ***other costs required to exercise their extended producer responsibility.***

2. Member States shall exonerate producers from their extended producer responsibility under paragraph 1 where the producers can demonstrate any of the following:
 - (a) the quantity of the ***substances contained in the products*** they place on the ***Union*** market is below ***1 tonne*** per year;
 - (b) the ***substance in*** products they place on the market ***are rapidly biodegradable in wastewaters or*** do not generate micro-pollutants in wastewaters at the end of their life.

3. The Commission is empowered to adopt implementing acts to establish detailed criteria on the uniform application of the condition laid down in paragraph 2, point (b), to specific categories of products ***and their biodegradability or hazardousness.*** Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2) ***no later than ... [the last day of the second year from the date of entry into force of this Directive].***

4. Member States shall ensure that producers referred to in paragraph 1 exercise their extended producer responsibility collectively ***through an organisation that fulfils the minimum requirements set out in Article 10.***

Member States shall ensure that:

- (a) the producers referred to in paragraph 1 are required to once every year provide the producer responsibility organisations with the following:
 - (i) the annual quantities of the products listed in Annex III that they place on the market in the context of their professional activity;
 - (ii) information on the ***hazardousness*** of the products referred to in point (i) in the wastewaters ***and on their biodegradability*** at the end of their life;
 - (iii) when relevant, a list of products exonerated in accordance with paragraph 2;
- (b) the producers referred to in paragraph 1 are required to contribute financially to the producer responsibility organisations in order to cover the costs arising from their extended producer responsibility;

- (c) each producer's contribution, as referred to in point (b), is determined based on the quantities and *hazardousness* in the wastewaters of the *substances contained in the* products that are placed on the market;
- (d) producer responsibility organisations are subject to annual independent audits of their financial management, including their capacity to cover the costs referred to in paragraph *I*, the quality and adequacy of the information collected under point (a) and the adequacy of the contributions collected under point (b);
- (e) *necessary measures to inform consumers about waste prevention measures, take-back and collection systems, the impact of inappropriate means of waste disposal of the products listed in Annex III, as well as their mis- and over-use, on the collection, treatment, and discharge of wastewater are taken.*

5. Member States shall ensure that:

- (a) the roles and responsibilities of all relevant actors involved, including producers referred to in paragraph 1, producer responsibility organisations, private or public operators of urban wastewater treatment plants and local competent authorities, are clearly defined;

- (b) urban wastewater management objectives are established in order to comply with the requirements and deadlines set under Article 8(1), (4) and (5) and any other quantitative or qualitative objectives that are considered relevant for the implementation of the extended producer responsibility;
- (c) a reporting system is in place to gather data on the products referred to in paragraph 1 placed on the market of the Member State by the producers and data on the quaternary treatment of wastewater, as well as other data relevant for the purposes of point (b) *of this paragraph*;
- (d) *competent authorities communicate and exchange the necessary data with other relevant competent authorities on a regular basis in order to fulfil the requirements of Articles 9 and 10 of this Directive.*

█

Article 10

Minimum requirements for producer responsibility organisations

1. Member States shall take the necessary measures to ensure that any producer responsibility organisation established under Article 9(4):
 - (a) has a clearly defined geographical coverage coherent with the requirements set out in Article 8;
 - (b) has the necessary financial and organisational means to meet the extended producer responsibility obligations of the producers, ***including financial guarantees to ensure the continuity of the quaternary treatment of urban wastewater in accordance with Article 8 of this Directive in all circumstances;***
 - (c) makes publicly available information about:
 - (i) its ownership and membership;
 - (ii) the financial contributions paid by producers ***in line with the requirements referred to in point (c) of the second subparagraph of Article 9(4);***
 - (iii) the activities that it ***undertakes*** every year, including clear information on how its financial means are used.

■

Member States shall ensure that such measures include a national recognition procedure of the producer responsibility organisations certifying their compliance with the requirements set out in this paragraph prior to their effective establishment and operation.

The provision of information to the public under this Article shall be without prejudice to preserving the confidentiality of business information in conformity with the relevant Union and national law.

2. Member States shall establish an adequate monitoring and enforcement framework to ensure that producer responsibility organisations *fulfil* their obligations *in a transparent manner*, that the financial means of producer responsibility organisations are properly used and that all actors having extended producer responsibility report reliable data to the competent authorities and, when requested, to the producer responsibility organisations.
3. Where, in the territory of a Member State, there are multiple producer responsibility organisations, the Member State concerned shall appoint at least one body independent of private interests or entrust a public authority to oversee the implementation.

4. Member State shall ensure that the producers established on the territory of another Member State *or in a third country*, and placing products on *the Member State's* market:
 - (a) appoint a legal or natural person established on its territory as an authorised representative for the purposes of fulfilling the extended producer responsibility obligations on its territory; or
 - (b) take equivalent measures to point (a).

5. *To ensure that the Extended Producer Responsibility system is implemented as optimally as possible, notably from a cost-benefit perspective, Member States shall organise regular dialogues on the implementation of the Extended Producer Responsibility system. This could include support for identifying measures to be taken by the competent authorities:*
 - (a) to reduce micro-pollutant pressure at source, and*
 - (b) to determine the most appropriate technologies for quaternary treatment.*

This dialogue *shall take place* between relevant stakeholders *and associations of stakeholders where relevant*, involved in the implementation of extended producer responsibility, including producers and distributors, producer responsibility organisations, private or public operators of urban wastewater treatment plants local authorities and civil society organisations.

■

6. *By ... [the date of entry into force of this Directive], the Commission shall provide for the organisation of exchange of information, experience and best practices between Member States on the implementation of Articles 9 and 10 and notably on:*

- (a) the measures to control the establishment, the recognition and functioning of Producer Responsibility Organisations;*
- (b) the measures to control the compliance of producers with their obligations defined in this Directive;*
- (c) the effective implementation of:*
 - (i) the coverage of the cost as referred to in Article 9(1), and*

- (ii) the control of the methods of calculation of producers contributions by the extended producer responsibility organisation as referred to in point (c) of Article 9(4);*
- (d) the exonerations provided according to Article 9;*
- (e) any other issue in relation to the effective implementation of Articles 9 and 10;*
- (f) the possible impacts of the application of the requirements referred to in Article 9 on the accessibility, availability and affordability of medicines placed on the Union market.*

The Commission shall publish the results of the exchange of information, experience and best practices on these and other relevant aspects, and where relevant, provide recommendations and/or guidelines to Member States.

- 7. Based on the information provided by the Member States, the Commission shall establish and regularly update a list of the requests for exonerations received by Member States from producers under Article 9(2). This list shall be made available on request to the national competent authorities of the Member States.*

Article 11

Energy neutrality ■

1. Member States shall ensure that energy audits, ***as defined in Article 2, point (32), of Directive (EU) 2023/1791***, of urban wastewater treatment plants and collecting systems ***in operation*** are carried out every four years. Those audits shall ***include an identification of the potential for cost-effective measures to reduce the use of energy and enhance the use and*** production of renewable energy, with a particular focus to identify and utilise the potential for biogas production ***or the recovery and use of waste heat either onsite or via a district energy system***, while reducing ***greenhouse gas*** emissions. The first audits shall be carried out:
 - (a) by 31 December **2028** for urban wastewater treatment plants treating a load of 100 000 p.e. and above and the collecting systems connected to them;
 - (b) by 31 December **2032** for urban wastewater treatment plants treating a load of between 10 000 p.e. and 100 000 p.e. and the collecting systems connected to them.

2. Member States shall ensure that, ***at national level***, the total annual energy from renewable sources ■ as defined in Article 2(1) of Directive (EU) 2018/2001 ***generated on- or off-site by or on behalf of the owners or the operators of*** urban wastewater treatment plants treating a load of 10 000 p.e. and above, ***and independently of whether this energy is used on- or off-site of the urban wastewater treatment plant by their owners or operators***, is equivalent to at least:
- (a) **20 %** of the total annual energy used by such plants by 31 December 2030;
 - (b) **40 % of the total annual energy used by such plants by 31 December 2035;**
 - (c) **70 %** of the total annual energy used by such plants by 31 December **2040**;
 - (d) 100 % of the total annual energy used by such plants by 31 December **2045**.

The generation of renewable energy by or on behalf of the owners or operators of the urban wastewater treatment plant cannot comprise the purchase of renewable energy.

3. *By way of derogation from paragraph 2, if a Member State does not reach the objective referred to in paragraph 2(d) despite having implemented all energy efficiency measures and all measures to enhance the production of renewable energy notably identified in the energy audits referred to in paragraph 1 of this Article, Member States may exceptionally allow the purchase of energy from non-fossil fuel sources. These purchases shall be limited to a maximum of 35 % of non-fossil fuel energy in relation to the objective referred to in paragraph 2(d).*
4. *By way of derogation from paragraph 2, if a Member State does not reach the objective referred to in paragraph 2(c) despite having implemented all energy efficiency measures and all measures to enhance the production of renewable energy notably identified in the energy audits referred to in paragraph 1 of this Article, Member States may exceptionally allow the purchase of energy from non-fossil fuel sources. These purchases shall be limited to a maximum of 5 percentage points of the requirement in paragraph 2(c). This derogation shall be granted only to Member States that can demonstrate by 31 December 2040 that 35 % external non-fossil fuel energy as referred to in the derogation of paragraph 2(a) will need to be purchased to reach the objective referred to in paragraph 2(d), taking into account all energy efficiency measures and all measures to enhance the production of renewable energy notably identified in the energy audits referred to in paragraph 1 of this Article.*

5. *The Commission may adopt an implementing act for establishing the methods to assess whether the objectives in paragraph 2 have been met. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).*

Article 12

Transboundary cooperation

1. *Without prejudice to relevant existing international agreements or arrangements on environmental water issues*, where waters within the area of jurisdiction of a Member State are adversely affected by discharges of urban wastewater from another Member State or third-country, the Member State whose waters are affected shall notify the other Member State or the third country and the Commission of the relevant facts.

This notification shall be immediate in case of **■** pollution that may significantly affect downstream water bodies. *In the event of any discharge affecting health or the environment in another Member State, the Member State in whose territory the discharge has occurred shall ensure that the competent authority of the other Member State and the Commission are immediately informed.*

2. ***Member States shall respond to each other in a timely manner, subject to the type, importance and possible consequences of the incident, after the notification by another Member State in accordance with paragraph 1.***

The Member States concerned shall cooperate in order to identify the discharges in question and the measures to be taken at source to protect the waters that are affected in order to ensure conformity with this Directive.

3. The concerned Member States shall inform the Commission of any cooperation referred to in paragraph 1. The Commission shall participate in such cooperation at the request of the concerned Member States.

Article 13

Local climatic conditions

Member States shall ensure that the urban wastewater treatment plants built to comply with the requirements set out in Articles 6, 7 ***and 8*** are designed, constructed, operated and maintained to ensure sufficient performance under all normal local climatic conditions.

Without prejudice to measures taken under paragraph 1 of Article 13 of Directive (EU) 2022/2557, seasonal variations of the load and the vulnerability to climate change shall be assessed and taken into account when designing, constructing and operating the urban wastewater treatment plants and collecting systems.

Article 14

Discharges of non-domestic wastewater

1. Member States shall ensure that the discharges *of* non-domestic wastewater into collecting systems and urban wastewater treatment plants *are* subject to prior *regulations and/or* specific authorisations by the competent authority *or appropriate body*.

■

Where specific authorisations are provided for discharges into collecting systems and wastewater treatment plants, Member States shall ensure that the competent authority:

- (a) consults *and informs* the operators of collecting systems and urban wastewater treatment plants into which the non-domestic wastewater is discharged before granting specific authorisations;
- (b) *on request* allows the operators of collecting systems and urban wastewater treatment plants receiving non-domestic wastewater discharge to consult the specific authorisations ■ in their catchment areas *preferably prior to them being granted*;
- (c) *where prior regulations are provided for discharges into collecting systems and urban wastewater treatment plants*, Member States shall ensure that the operators of collecting systems and urban wastewater treatment plants into which the non-domestic wastewater is discharged, are consulted before the prior regulations are adopted.

The prior regulations and/or specific authorisations referred to in this paragraph shall ensure the following:

- (a) the water quality requirements set out in other Union legislation, including Directives 2000/60/EC and 2008/105/EC, are fulfilled, and, when applicable, that quality and quantity of relevant discharges of non-domestic wastewater is monitored. In particular the pollutant load in the discharge from the urban wastewater treatment plant does not deteriorate the status of the receiving water body and does not prevent that water body from achieving such status, in accordance with the objectives set out in Article 4 of Directive 2000/60/EC;*
- (b) the released polluting substances do not impede the operation of the urban wastewater treatment plant, do not damage collecting systems, urban wastewater treatment plants and associated equipment or the capacity to recover resources, including the reuse of treated water and the recovery of nutrients or other material from urban wastewater or sludge;*
- (c) the released polluting substances do not harm the health of the staff working in collecting systems and urban wastewater treatment plants;*
- (d) the urban wastewater treatment plant is designed and equipped to abate the released polluting substances;*

(e) where an urban wastewater treatment plant treats discharges from an installation holding a permit referred to in Article 4 of Directive 2010/75/EU of the European Parliament and of the Council⁴⁸, the pollutant load from the discharges of that plant does not exceed the pollutant load that would be discharged if the discharges were released directly from the installation and were compliant with the emission limit values applicable according to this Directive.

Member States shall ensure that for the discharge of non-domestic wastewater into collecting systems and urban waste water treatment plants that discharge in catchment areas for abstraction points of water intended for human consumption, no specific authorisation is granted or no prior regulation allows such a discharge of non-domestic wastewater without taking into account the risk assessment and risk management of the catchment areas for abstraction points of water intended for human consumption as mentioned in Article 8 of Directive (EU) 2020/2184 and the risk management measures on the basis of this Article.

⁴⁸ Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) (OJ L 334, 17.12.2010, p. 17).

2. Member States shall *ensure that competent authorities or appropriate bodies* take the appropriate measures, including a review *and, where necessary, revocation* of the *prior regulations and/or specific authorisations*, to identify, prevent and reduce as far as possible the sources of pollution in non-domestic wastewater referred to in paragraph 1 *of this Article* where any of the following situations arise:
- (a) pollutants have been identified at the inlets and outlets of the urban wastewater treatment plant under the monitoring of Article 21(3);
 - (b) sludge arising from urban wastewater treatment is to be used in accordance with Council Directive 86/278/EEC⁴⁹;
 - (c) treated urban wastewater is to be reused in accordance with Regulation (EU) 2020/741 *or reused for purposes other than agricultural purposes*;
 - (d) the receiving waters are used for abstraction of water intended for human consumption as defined in Article 2, point (1), of Directive (EU) 2020/2184;
 - (e) the pollution of the non-domestic wastewater discharged into the collecting system, or the urban wastewater treatment plant poses a risk to the operation of that system or plant.

⁴⁹ Council Directive 86/278/EEC of 12 June 1986 on the protection of the environment, and in particular of the soil, when sewage sludge is used in agriculture (OJ L 181, 4.7.1986, p. 6).

3. The ***prior regulations and*** specific authorisations referred to in paragraph 1 ***of this Article*** shall fulfil the requirements set out in ***paragraph 1, third subparagraph***. The Commission is empowered to adopt delegated acts in accordance with the procedure referred to in Article 27 to amend ***requirements referred to in paragraph 1, third subparagraph***, in order to adapt it to technical and scientific progress in the field of environmental protection.
4. The specific authorisations referred to in paragraph 1 shall be reviewed and **█**, where necessary, adapted at least every ***ten*** years **█**.

The prior regulations referred to in paragraph 1 shall be reviewed at regular intervals and, where necessary, adapted.

If the characteristics of the non-domestic wastewater, the urban wastewater treatment plant or the receiving water body change significantly, the specific authorisations shall be reviewed and adapted to these changes.

Article 15

Water reuse and discharges of urban wastewater

1. Member States shall systematically promote the reuse of treated wastewater from all urban wastewater treatment plants *where appropriate, especially in water-stressed areas, and for all appropriate purposes. The potential for the reuse of treated wastewater shall be assessed taking into account the river basin management plans established under the Water Framework Directive 2000/60/EC and Member States' decisions under Article 2(2) of Regulation (EU) 2020/741. Member States shall ensure that when treated wastewater is reused or if the reuse is planned, it does not endanger the ecological flow in the receiving waters and there is no adverse effect for the environment and human health.* Where treated wastewater is reused for agricultural irrigation, it shall comply with the requirements established under Regulation (EU) 2020/741. *When strategies on water resilience at Member States level are available, measures on promoting the reuse of treated wastewater and on the actual reuse shall be considered in these strategies.*

Where treated urban wastewater is reused for agricultural irrigation, Member States may derogate from the requirements for tertiary treatment in Table 2 of Annex I, for the fraction of treated urban wastewater that is exclusively destined for reuse in agricultural irrigation, where all of the following can be demonstrated:

- (a) the nutrient content in the fraction reused does not exceed the demand of the targeted crops; and*
- (b) there are no risks for the environment, particularly in relation to eutrophication of the waters in the same catchment area; and there are no risks to human health particularly in relation to pathogenic organisms; and*
- (c) the treatment plant has enough capacity to treat or store urban wastewater, in order to avoid discharge to receiving waters that is not meeting the requirements set out in Part B and Table 2 of Annex I in accordance with the control methods laid down in Part C of Annex I.*

I

2. Member States shall ensure that ***at least all*** discharges from urban wastewater treatment plants ***of 1 000 p.e. and above are*** subject to ***prior regulations and/or specific authorisations***. ***Such regulations and/or authorisations*** shall ensure that the requirements set out in Part B of Annex I are fulfilled.
3. The ***prior regulations and/or*** specific authorisations referred to in paragraph 2 shall be reviewed at least every ***ten*** years and, if necessary, adapted. ***The provisions of the specific authorisations shall be updated in the cases where the characteristics of incoming urban wastewaters or the discharges from the urban wastewater treatment plant or of the receiving water body change significantly to ensure that those requirements set out in Part B of Annex I remain fulfilled.***
4. ***Member States shall take all necessary measures to adapt their urban wastewater collection and treatment infrastructures to address increased loads of domestic wastewater, including the construction of new infrastructures where necessary.***

By doing so, Member States shall be considered to comply with the environmental objectives set out in Article 4 of Directive 2000/60/EC if all the following conditions are met:

- (a) the construction or expansion of an urban wastewater treatment plant to treat increased loads or otherwise untreated loads of domestic wastewater is subject to prior authorisation in accordance with this Directive;*
- (b) the benefits of the urban wastewater treatment plant in point (a) cannot for reasons of technical feasibility or disproportionate cost be achieved by other means, including the consideration of alternative points of discharge of urban wastewater plants, that would contribute to achieve the environmental objectives in Article 4 of Directive 2000/60/EC;*
- (c) all technically feasible mitigating measures are taken to minimize the negative impacts of the urban wastewater treatment plant on the affected water bodies and are set out in the authorisations referred to in Articles 14 and 15 of this Directive; those measures shall include, where so is required more stringent treatment requirements than those applied prior to the increase of domestic wastewater load, aiming to meet the requirements of the directives referred to in Part B, point 6, of Annex I of this Directive;*
- (d) all technically feasible mitigating measures are implemented to minimize the negative impact of other activities causing similar pressures in the same water bodies.*

If failure to prevent deterioration or failure to achieve the objectives in Article 4 of Directive 2000/60/EC in a body of surface water is the result of an authorisation in point (a), these authorisations in point (a) shall be specifically set out and the abovementioned conditions explained in the River Basin Management Plans required under Article 13 of Directive 2000/60/EC.

Article 16

Biodegradable non-domestic wastewater

1. Member States shall establish requirements for the discharge of biodegradable non-domestic wastewater that are appropriate to the nature of the industry concerned and that ensure at least the same level of environmental protection as the requirements set out in part B of Annex I.
2. The requirements referred to in paragraph 1 ***of this Article*** shall apply when the following conditions are fulfilled:
 - (a) the wastewater originates from plants treating a load of 4 000 p.e. and above that belong to the industrial sectors listed in Annex IV and that do not carry out any of the activities listed in Annex I to Directive 2010/75/EU;

- (b) the wastewater does not enter an urban wastewater treatment plant before it is discharged to receiving waters ('direct discharge').

Article 17

Urban wastewater surveillance

■

- 1. ■ Member States shall set up a national system for cooperation and coordination between competent authorities responsible for public health and competent authorities responsible for urban wastewater treatment with regard to:
 - (a) the identification of *relevant* public health parameters, *that are to be monitored at least in the inlet of urban wastewater treatment plants, taking into account available recommendations by the European Center of Disease Prevention and Control (ECDC), by the Health Emergency Preparedness and Response Authority (HERA) and the World Health Organisation (WHO) among others and including for instance those in the following list:*
 - (i) *SARS-CoV-2 virus and its variants;*

- (ii) poliovirus;*
 - (iii) influenza virus;*
 - (iv) emerging pathogens;*
 - (v) any other public health parameters that are considered relevant by the competent authorities of the Member States for monitoring;*
- (b) the clear allocation of roles, responsibilities and costs among operators and relevant competent authorities, including where related to sampling and analysis;*
- (c) the determination of the location and the frequency of urban wastewater sampling and analysis for each public health parameter identified in accordance with *point (a)*, **thus regarding** the available health data and the needs in terms of public health data and, where relevant, the local epidemiological situations;
- (d) the organisation of an appropriate and timely communication of the monitoring results to the competent authorities responsible for public health and, *where relevant, competent authorities for drinking water in order to facilitate the implementation of the Article 8 of the Directive (EU) 2020/2184 on the quality of the water intended for human consumption and* to Union platforms, where such platforms are available, **and in accordance with applicable law on protection of personal data.**

2. When a public health emergency is declared by the competent authority responsible for public health in the Member State, ***relevant public health parameters*** shall be monitored in urban wastewaters from ***a representative distribution*** of the national population, ***to the extent that the relevant health parameters are found in the urban wastewaters***. This monitoring shall continue until ***the*** competent authority declares that the public health emergency ***has ended, or during a longer period if deemed useful for other purposes, according to the same competent authority***.

To determine whether there is a public health emergency, the competent authority shall ***consider Commission decisions adopted pursuant to Article 23(1) of Regulation (EU) 2022/2371***, assessments of the European Centre for Disease Prevention and Control, decisions of the World Health Organisation (WHO) taken in accordance with the International Health Regulations.

3. For agglomerations of 100 000 p.e. and above, Member States shall, by ... ***[the last day of the second year from the date of adoption of the implementing act in the following subparagraph], ensure that antimicrobial resistance is monitored in urban wastewater***.

By ... [18 months from the date of entry into force of this Directive], the Commission shall adopt implementing acts in accordance with the procedure referred to in Article 28(2) to ensure *a* uniform application of this Directive by establishing a *minimum frequency of sampling and a* harmonised methodology for measuring antimicrobial resistance in urban wastewaters, *taking into account at least all available data from national public health authorities and national authorities responsible for monitoring antimicrobial resistance.*

4. Results from monitoring referred to in this Article shall be reported in accordance with Article 22(1), point (g).

Article 18

Risk assessment and management

1. By *31 December 2027*, Member States shall identify *and assess* the risks caused by urban wastewater discharges to the environment and human health, *taking into account seasonal fluctuations and extreme events* and at least those related to the following:
 - (a) the quality of a water body used for the abstraction of water intended for human consumption as defined in Article 2, point (1), of Directive (EU) 2020/2184;

(b) the quality of bathing water falling within the scope of Directive 2006/7/EC;

■

(c) the quality of a water body where aquaculture activities as defined in Article 4, point (25), of Regulation (EU) No 1380/2013 take place;

(d) *the status of the receiving groundwater body as defined in Article 2 of Directive 2000/60/EC as well as all other environmental objective as stated in Article 4 of that Directive for the receiving groundwater body;*

(e) *the status of the marine environment as defined in point 5 of Article 3 of Directive 2008/56/EC;*

(f) *the status of the receiving surface water body as defined in Article 2 of Directive 2000/60/EC as well as all other environmental objective as stated in Article 4 of that Directive for the receiving surface water body.*

2. Where risks have been identified in accordance with paragraph 1, Member States shall adopt appropriate measures to address them, which shall include where appropriate the following measures:

(a) taking additional measures to prevent and reduce pollution from urban wastewater at source, where required to safeguard the quality of the receiving water body in complement to the measures referred to in Article 14(2);

■

- (b) establishing collecting systems in accordance with Article 3 for agglomerations with a p.e. of less than 1 000;
- (c) applying secondary treatment in accordance with Article 6 to discharges of urban wastewater from agglomerations with a p.e. of less than 1 000;
- (d) applying tertiary treatment in accordance with Article 7 to discharges of urban wastewater from agglomerations with a p.e. of less than 10 000;

- (e) applying quaternary treatment in accordance with Article 8 to discharges of urban wastewater from agglomerations with a p.e. of less than 10 000, ***in particular where urban wastewater is discharged into water bodies used for abstraction of water intended for human consumption, bathing water, areas where aquaculture activities take place and when treated urban wastewater is reused for agricultural purposes;***
 - (f) establishing integrated urban wastewater management plans in accordance with Article 5 for agglomerations below 10 000 p.e. and adoption of measures referred to in Annex V;
 - (g) applying more stringent requirements for the treatment of collected urban wastewaters than the requirements set out in Annex I, Part B.
3. The identification of the risks carried out in accordance with paragraph 1 of this Article shall be reviewed every ***six years aligned with the timing of the review of the River Basin Management Plans developed under the Directive 2000/60/EC and starting on 31 December 2033.*** A summary of the identified risks accompanied with a description of the measures adopted in accordance with paragraph 2 of this Article shall be included in the ***appropriate River Basin Management Plans and in the national implementation programmes referred to in Article 23 and communicated to the Commission on request. That summary shall be made available to the public.***

Article 19

Access to sanitation

Without prejudice to the principles of subsidiarity and proportionality, whilst taking into account local and regional perspectives and circumstances for sanitation, Member States shall take all necessary measures to ***ensure*** access to sanitation for all, in particular for vulnerable and marginalised groups.

For that purpose, Member States shall by ***12 January 2029***:

- (a) identify ■ people without access, or with limited access, to sanitation facilities, ***paying special attention to*** vulnerable and marginalised groups, and provide reasons for such lack of access;
- (b) assess the possibilities ***and improve*** access to sanitation facilities for ***such*** people ■ ;
- (c) for all agglomerations of 10 000 p.e. and above, encourage the establishment of a sufficient number of sanitation facilities in public spaces, which are freely and, in particular for women, safely accessible ***and in such case ensure appropriate information to the public***;
- (d) ***for all agglomerations of 5 000 p.e. and above encourage competent authorities to make available a sufficient number of free sanitation facilities in public buildings, in particular in administrative buildings***;

- (e) *encourage the making available of sanitation facilities for all, for free or for a low service fee, in restaurants, shops and similar private spaces accessible to the public.*

Article 20

Sludge and resource recovery

1. Member States shall *encourage the recovery of valuable resources and* take the necessary measures to ensure that sludge management routes are conform to the waste hierarchy provided for in Article 4 of Directive 2008/98/EC. Such routes shall:
 - (a) maximize prevention;
 - (b) *prepare for reuse, recycling and other recovery of resources, in particular phosphorous and nitrogen, taking into national or local valorisation options;*
 - (c) minimize the adverse effects on the environment *and human health.*

█

2. The Commission is empowered to adopt delegated acts in accordance with the procedure referred to in Article 27 to supplement this Directive by ***specifying a combined*** minimum reuse and recycling ***rate*** for phosphorus ***from sludge and from urban wastewater not reused under the derogation of Article 15(1), taking*** into account available technologies, ***resources and the economic viability*** for phosphorus ***recovery and taking into account phosphorus contents of the sludge and the level of saturation of the national market with organic phosphorus from other sources while ensuring that there is safe sludge management and no adverse impact on human health and the environment. The Commission shall adopt those delegated acts by ... [3 years after entry into force of this Directive].***

Article 21

Monitoring

1. Member States shall ensure that competent authorities ***or appropriate bodies*** monitor:
 - (a) discharges from urban wastewater treatment plants in order to verify compliance with the requirements of Part B of Annex I in accordance with the methods for monitoring and evaluation of results laid down in Part C of Annex I; this monitoring shall include loads and concentrations of the parameters listed in Part B of Annex I;

- (b) amounts, composition and destination of sludge, *taking into account requirements of Directive 86/278/EEC for sludge intended to be used in agriculture*;
- (c) *where the derogation of Article 15(1) is used, the quantities per year and per month of urban wastewater reused in agriculture that is subject to a derogation referred to in Article 15(1); the nutrient content of the fraction reused for agricultural irrigation and the period during which that fraction is reused compared to the monthly water and nutrient demand of the crops targeted by this reused urban wastewater*;
- (d) the greenhouse gases, *including at least CO₂, N₂O, CH₄, emitted from urban wastewater treatment plants of \geq 10 000 p.e. and above by means of analysis, calculations or modelling where appropriate*;
- (e) *the energy used and produced by urban wastewater treatment plants owners or their operators of 10 000 p.e and above regardless of whether it is used or generated on- or off-site, in line with the requirements referred to in paragraph 2 of Article 11, as well as the energy purchased under derogations referred to in paragraphs 3 and 4 of Article 11 where these derogations are applied.*

2. For all agglomerations *referred to in Article 5, paragraphs 1 and 3*, Member States shall ensure that competent authorities, *appropriate bodies or operators of the collecting system carry out representative monitoring, at relevant points, of storm water overflows into water bodies and of discharges of urban runoff from separate systems, in order to estimate the concentration and loads of the parameters listed in Table 1 of Annex I, and, where relevant, of Table 2, as well as the content of microplastics and relevant pollutants. Member States may use the results of this monitoring in view of modelling where deemed appropriate.*
3. For all agglomerations of 10 000 p.e. *and above*, Member States shall *ensure that competent authorities or appropriate bodies* monitor, at the inlets and outlets of urban wastewater treatment plants, the concentration and loads in the urban wastewater of the following elements:
 - (a) pollutants *that are likely to be found in urban wastewaters* listed in:
 - (i) Annexes VIII and X to Directive 2000/60/EC, the Annex *I* to Directive 2008/105/EC, Annex I to Directive 2006/118/EC and Part B of Annex II to Directive 2006/118/EC;

- (ii) the Annex to Decision 2455/2001/EC of the European Parliament and of the Council⁵⁰;
 - (iii) Annex II to Regulation (EC) No 166/2006;
 - (iv) Annexes I and II to Directive 86/278/EEC;
- (b) parameters listed in Part B of Annex III to Directive (EU) 2020/2184, where urban wastewater is discharged in a catchment area referred to in Article 8 of that Directive; *where for PFAS Member states can choose to use one or both parameters 'PFAS Total' and/or 'Sum of PFAS' when a methodology is available in accordance with the implementing act referred to in paragraph 5;*
- (c) *Annex I of Directive 2006/7/EC where there are direct discharges from urban wastewater treatment plants into bathing water areas during the bathing season, which might prevent compliance with Directive 2006/7/EC;*

⁵⁰ Decision No 2455/2001/EC of the European Parliament and of the Council of 20 November 2001 establishing the list of priority substances in the field of water policy and amending Directive 2000/60/EC (OJ L 331, 15.12.2001, p. 1).

- (d) the presence of *microplastics*;
- (e) *pollutants listed under points (a) and (b) may be excluded from the monitoring under this paragraph as long as it can be demonstrated, inter alia on the basis of monitoring results, that they are absent in urban wastewaters.*

For all agglomerations of above 10 000 p.e., Member States shall *ensure that competent authorities or appropriate bodies* monitor the presence of *microplastics* in the sludge *when relevant and, notably, when it is reused in agriculture.*

The monitoring referred to in *paragraph 3* shall be carried out with the following frequencies:

- (a) at least two samples per year, with maximum 6 months between the samples, for agglomerations of *150 000* p.e. and more;
- (b) at least one sample every *two* years for agglomerations of between 10 000 p.e. and *150 000* p.e.

This monitoring frequency may be halved in subsequent years if the monitoring results for the pollutants referred to in paragraph 3 are below applicable Environmental Quality Standards under Directive 2008/105/EC during three successive samples. The monitoring frequency should be reviewed at least every year.

4. The Commission is empowered to adopt implementing acts to ensure a uniform application of this Directive by establishing *methodologies* for measuring *and estimating, modelling direct and indirect greenhouse gas emissions from urban wastewater treatment plants, and microplastics* in urban wastewater and sludge. *The Commission shall provide the methodologies by ... [30 months from the date of entry into force of this Directive] in accordance with the procedure referred to in Article 28(2).*

■

5. *The Commission shall adopt implementing acts in accordance with the procedure referred to in Article 27 to ensure the uniform application of this Directive by establishing a methodology for measuring ‘PFAS Total’ and ‘Sum of PFAS’ in urban wastewater Those implementing acts shall be adopted by ... [24 months from the entry into force of this Directive] in accordance with the examination procedure referred to in Article 28(2).*

6. *Based on the report of the Member States, the Commission may adopt implementing acts in accordance with the procedure referred to in Article 28(2) to ensure a uniform application of paragraph 3 of this Article by specifying a minimum list of relevant pollutants likely to be found in urban wastewater and by developing a methodology for identifying relevant pollutants likely to be found, taking into account the local conditions and the risk assessment carried out under relevant Union legislation as well as criteria and frequency for revising the exclusion of some pollutants as set out in paragraph 3, point (e).*

Article 22

Information on monitoring of implementation

1. Member States, assisted by the European Environment Agency (EEA), shall:
 - (a) by 31 December **2028**, set up a data set containing information collected in accordance with Article 21 including information concerning the parameters referred to in Article 21(1), point (a), and the results of the tests with regard to the pass/fail criteria established in Part C of Annex I and update that data set annually thereafter; ■
 - (b) by 31 December **2028**, set up a data set indicating the percentage of urban wastewater which is collected and treated in accordance with Article 3 and update that data set annually thereafter;
 - (c) by 31 December **2028**, set up a data set containing information on *the implementation of* Article **4(5)** and on the percentage of the urban wastewater load from agglomerations above 2 000 p.e. which is treated in individual systems and update that data set annually thereafter;
 - (d) by 31 December **2028**, set up a data set containing information on the number of samples collected and the number of samples taken in accordance with Part C of Annex I that have failed *and update that data set annually thereafter*;

- (e) by 31 December **2030**, set up a data set containing information on **greenhouse** gas emissions with a breakdown between different gasses and on the total energy used and renewable energy produced by each urban wastewater treatment plant of 10 000 p.e. and above as well as a calculation of the percentage of achievement of the targets set out in Article 11(2), ***the percentage of energy purchased from non-fossil fuel sources and, when available accompanied by a break-down of the different types of non-fossil fuel energy sources used, where the derogation referred to in Article 11(3) is used,*** and update that data set annually thereafter;
- (f) by 31 December **2030**, set up a data set containing information on measures taken in accordance with point 3 of Annex V and update that data set annually thereafter;
- (g) by 31 December **2030**, set up a data set containing the monitoring results referred to in accordance with Article 17(1) and **(3)** and update that data set annually thereafter;
- (h) by 31 December **2030**, set up a data set containing the list of areas identified as sensitive to eutrophication **■** and update that data set ***in accordance with Article 7(2)***;

- (i) by 31 December 2030, set up a data set containing the list of areas identified as areas where the concentration or the accumulation of ***micropollutant*** represents a risk for human health or the environment and update that data set ***in accordance with Article 8(2)***;
- (j) by 12 January 2029, set up a data set containing information on measures taken to improve access to sanitation in accordance with Article 19, points ***(a), (b), (c)***, including information on the share of their population that has access to sanitation ***in agglomerations of 10 000 p.e. and above*** and update that data set every 6 years thereafter;
- (k) ***by December 2030, Member States where biomedica are used shall set up a data set containing the type of biomedica used and a short description of the measures taken by urban wastewater treatment plants using biomedica to avoid spills into the environment, and update that data set every five years thereafter;***
- (l) ***by 31 December 2030, set up a data set containing the monitoring results referred to in point (c) of Article 21(1) with a comparison of the monthly water and nutrient demand of the crops targeted by the reused fraction of treated urban wastewater referred to in Article 15(1), and update that dataset annually thereafter.***

2. Member States shall ensure that the Commission and the EEA have █ access to the data sets referred to in paragraph 1.

3. The information reported by Member States in accordance with Article 5 of Regulation (EC) No 166/2006 shall be taken into account for the reporting required under this Article *for those pollutants related with urban wastewaters*.

With regard to the information referred to in paragraph 1, the EEA shall provide the public with access to relevant data through the European Pollutant Release and Transfer Register established under Regulation (EC) No 166/2006.

4. The Commission is empowered to adopt implementing acts specifying the format of the information to be provided in accordance with paragraph 1. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2) *by 31 December 2028 for information referred to in points (e), (f), (g), (i), (j), (k) and (l) of paragraph 1. The Commission may adopt implementing acts in accordance with the examination procedure referred to in Article 28(2) to specify the format of the information to be provided in accordance with points (a), (b), (c), (d) and (h) of paragraph 1.*

Article 23

National implementation programme

1. By ... [the **first** day of the **thirty sixth** month after the date of entry into force of this Directive], Member States shall establish a national implementation programme for this Directive.

Those programmes shall include:

- (a) an assessment of the level of implementation of Articles 3 to 8;
- (b) the identification and planning of investments required to implement this Directive for each agglomeration, including an indicative financial estimation, ***including when available an estimation of the financial contribution from the producer responsibility organisations established in accordance with Article 10 of this Directive***, and a prioritisation of those investments related to the size of the agglomeration and the ***level of*** environmental impact of untreated urban wastewater ***and related risks for environment or human health***;

- (c) an estimate of investments needed to renew, ***upgrade or replace*** existing urban wastewater infrastructures, including collecting systems, based on ***depreciation rates, technical and operational conditions, and with the aim to prevent possible leakage, infiltration and misconnected inflow into the collecting networks, and using, where appropriate, digital instruments;***
- (d) the identification, or at least an indication, of potential sources of public financing, when needed to complement user charges.
- (e) ***any information required under Articles 6(4) and 7(7) where applicable.***

Member States may continue using the available Union funding for the implementation of the provisions of this Directive, in order to ensure that all citizens benefit equally from efficient collection and treatment of urban wastewater. Member States may equally exchange best practices on how to improve absorption of Union Funds.

When Member states establish, during the implementation of national implementation programme, that due to the necessity to preserve cultural heritage it is not possible to respect the deadlines referred to in Article 3(2) and/or Article 6(3) in specific areas, Member States shall update their national implementation programme. This update shall contain a list of the agglomerations with areas concerned, a detailed justification demonstrating that the achievement of the required infrastructures is particularly difficult due to the necessity to preserve cultural heritage, and an adjusted timeline to finalise the required infrastructures in these areas. Extensions of the deadlines referred to in Article 3(2) and/or Article 6(3) shall be set area-specific, kept as short as possible and shall not exceed 8 years. The updated national implementation programme shall be submitted to the Commission by 31 December.

■

2. By ... [the first day of the thirty-sixth month after the date of entry into force of this Directive], Member States shall submit to the Commission their national implementation programmes, except where they demonstrate, based on the monitoring results referred to in Article 21, that they are in compliance with Articles 3 to 8.

3. Member States shall update their national implementation programmes at least every **6** years. They shall submit them to the Commission by 31 December, except where they can demonstrate that they are in compliance with Articles 3 to 8.

4. The Commission is empowered to adopt implementing acts establishing the methods and formats for submission of the national implementation programmes. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).

Article 24

Information to the public

1. Member States shall ensure that adequate, *easily accessible*, and up-to-date information on urban wastewater collection and treatment is available to the public online, in a user-friendly and customised way, *for each agglomeration of above 1 000 p.e. or each relevant administrative area*. The information shall include at least the data listed in Annex VI.

The information referred to in paragraph 1 shall also be provided by other means upon justified request.

2. In addition, *where costs are recovered totally or partly through a water tariff system*, Member States shall ensure that all *households in agglomerations of above 10 000 p.e., and preferably above 1 000 p.e.*, connected to collecting systems receive regularly and at least once a year, in the most appropriate *and easily accessible* form, *for example and where available* on their invoice or by *digital means such as* smart applications *or websites*, without having to request it, the following information:
- (a) information on the compliance of the collection and treatment of urban wastewater with Articles 3, 4, 6, 7 and 8, including a comparison between the actual releases of pollutants in receiving waters with the limit values set out in Tables 1, 2 and 3 of Annex I; *this information shall be presented in a manner that allows for easy comparison, for example in the form of a percentage of compliance;*
 - (b) the volume or estimated volume of urban wastewater collected and treated per year or per billing period for the household or the connected entity in cubic meter, together with trends and the price of urban wastewater collection and treatment for *that* household (cost per litre and cubic meter);
 - (c) a comparison of the yearly volume of urban wastewater collected and treated for the household per year and an indication of the average volume of a household in the concerned agglomeration;

█

(d) a link to the online content referred to in paragraph 1.

Where information regarding individual usage is not available, the information in points (a) to (d) above will be provided at agglomeration level in a user-friendly manner via a website or smart application.

3. The Commission may adopt delegated acts in accordance with the procedure set out in Article 27 to amend paragraph 2 ***of this Article*** and Annex VI by updating the information to be provided to the public online and to the ***households*** connected to collecting systems in order to adapt these requirements to technical progress and the availability of data in the field.
4. The Commission may adopt implementing acts specifying the format and the methods of presenting the information to be provided in accordance with paragraphs 1 and 2. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 28(2).

Article 25

Access to Justice

1. Member States shall ensure that, in accordance with the relevant national legal system, members of the public concerned have access to a review procedure before a court of law, or another independent and impartial body established by law to challenge the substantive or procedural legality of decisions or acts or omissions subject to Articles 6, 7 or 8 of this Directive when at least one of the following conditions is met:

- (a) they have a sufficient interest;
- (b) they maintain the impairment of a right, where administrative procedural law of a Member State requires this as a precondition.

The review procedure shall be fair, equitable, timely and not prohibitively expensive, and shall provide for adequate and effective redress mechanisms, including injunctive relief as appropriate.

2. ***Standing in the review procedure shall not be conditional on the role that the concerned member of the public played during a participatory phase of the decision-making procedures under this Directive.***

3. Member States shall determine at what stage the decisions, acts or omissions referred to in paragraph 1 may be challenged.
4. ***Member States shall ensure that practical information is made available to the public on access to administrative and judicial review procedures referred to in this Article.***

Article 26

Compensation

1. Member States shall ensure that, where damage to human health has occurred as a result of a violation of national measures that were adopted pursuant to this Directive, the individuals affected have the right to claim and obtain compensation for that damage from the relevant natural or legal persons, ***in accordance with national rules.***
2. Member States shall ensure that, as part of the public concerned, non-governmental organisations promoting the protection of human health or the environment and meeting any requirements under national law are allowed to represent the individuals affected ■ . Member States shall ensure that a claim for a violation leading to a damage cannot be pursued twice, by the individuals affected and by the non-governmental organisations referred to in this paragraph.

3. Member States shall ensure that national rules and procedures relating to claims for compensation are designed and applied in such a way that they do not render impossible or excessively difficult the exercise of the right to compensation for damage caused by a violation pursuant to paragraph 1.

■

4. Member States *may establish* the limitation periods for bringing actions for compensation referred to in paragraph 1 ■. Such periods shall not begin to run before the violation has ceased and the person claiming the compensation knows *or can reasonably be expected to know* that he or she suffered damage from a violation pursuant to paragraph 1.

5. *Member States shall ensure that information is made available to the public on their right to claim compensation for damage.*

Article 27

Exercise of the delegation

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The power to adopt delegated acts referred to in Articles [7(7), 8(5), 14(3), 20(2), and 24(3)] shall be conferred on the Commission for a period of five years from ... [the date of entry into force of this Directive]. The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the five-year period. The delegation of power shall be tacitly extended for periods of an identical duration unless the European Parliament or the Council opposes such extension not later than three months before the end of each period.
3. The delegation of power referred to in Articles [7(7), 8(5), 14(3), 20(2), and 24(3)] may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

4. Before adopting a delegated act, the Commission shall consult experts designated by each Member State in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making.
5. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
6. A delegated act adopted pursuant to Articles [7(7), 8(5), 14(3), 20(2), or 24(3)] shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 28
Committee

1. The Commission shall be assisted by *the* committee for the adaptation to scientific and technical progress and implementation of the directive on urban *wastewater* treatment *established by Directive 91/271/EEC. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.*
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Article 29
Penalties

1. *Without prejudice to the obligations of Member States under Directive 2008/99/EC of the European Parliament and of the Council⁵¹*, Member States shall lay down the rules on penalties applicable to infringements of national provisions adopted pursuant to this Directive and shall take all measures necessary to ensure that they are implemented. The penalties provided for shall be effective, proportionate and dissuasive. ■

⁵¹ Directive 2008/99/EC of the European Parliament and of the Council of 19 November 2008 on the protection of the environment through criminal law (OJ L 328, 6.12.2008, p. 28).

2. Member States shall ensure that the penalties established pursuant to this Article give due regard to the following, as applicable:
 - (a) the nature, gravity, and extent of the *infringement*;
 - (b) *where appropriate*, the intentional or negligent character of the violation;
 - (c) the population or the environment affected by the *infringement*, bearing in mind the impact of the infringement on the objective of achieving a high level of protection of human health and the environment;
 - (d) *the repetitive or singular character of the infringement.*
 - (e) *the financial situation of the natural or legal person held responsible.*
3. Member States shall without undue delay notify the Commission of the rules and measures referred to in paragraph 1 and of any subsequent amendments affecting them.

Article 30

Evaluation

1. By 31 December **2033** and by 31 December 2040, the Commission shall carry out an evaluation of this Directive based in particular on the following elements:
 - (a) the experience gained through the implementation of this Directive;
 - (b) the data sets referred to in Article 22(1);
 - (c) relevant scientific, analytical and epidemiological data, including results from research projects funded by the Union;
 - (d) WHO recommendations, where available;

This evaluation shall, at minimum, contain an analysis of:

- (a) the adequacy of the public health parameters referred to Article 17(1) to be monitored by Member States;*
- (b) the added-value of mandatory monitoring of specific public health parameters;*

- (c) ■ the possible need to adapt the list of products to be covered by extended producer responsibility to the evolution of the range of products placed on the market, improved knowledge on the presence of *micropollutants* in wastewaters, their impacts on public health and the environment, data resulting from the new monitoring obligations on *micropollutants* in the inlets and outlets of the urban wastewater treatment plants ***and an analysis of the need to revise the condition for exoneration from extended producer responsibility referred to in point (a) of Article 9(2);***
- (d) ***the added value and the appropriateness of requiring mandatory national water reuse plans including national targets and measures taking into account the evolution of the European policies and legislation related to water management;***
- (e) ***the objective of energy neutrality in order to analyse the technical and economic feasibility and environmental and climate benefits to achieve a higher energy autonomy of the sector;***

- (f) the possibilities for measuring direct and indirect greenhouse gas emissions emitted from the urban wastewater sector, including emissions of other greenhouse gases than those referred to in point (d) of paragraph 1 of Article 21, and for setting requirements for actual measurements in connection with the monitoring taking into account the most recent methodologies for greenhouse gas emissions of the urban wastewater sector set out by the Intergovernmental Panel on Climate Change;***
- (g) the possible impacts on the functioning of the internal market of the potentially different contribution rates for producers set by Member States and that are referred to in Article 9(1);***
- (h) the feasibility and appropriateness of the development of an Extended Producer Responsibility system for products generating Per- and Polyfluoroalkyl Substances (PFAS) and microplastics in urban wastewater based notably on the monitoring data from Article 21 on PFAS and microplastics in the inlets and outlets of the urban wastewater treatment plants;***
- (i) the possibility and the time required to reach climate neutrality of the urban wastewater treatment sector;***

(j) the opportunity and feasibility to set Union minimum reuse and recycling rates for nitrogen from sludge and/or from urban wastewater.

The Commission shall present a report on the main findings of the evaluation referred to in the first subparagraph to the European Parliament, the Council, the European Economic and Social Committee, and the Committee of the Regions **accompanied, where the Commission finds it appropriate, by relevant legislative proposals.**

2. Member States shall provide the Commission with the information necessary for the preparation of the report referred to in paragraph 1, second subparagraph.

Article 31

Review

Every five years, the Commission shall present a report to the European Parliament and the Council on the implementation of this Directive. **On the basis of this report, the Commission may send early warnings to Member States that are failing or at risk of failing to meet the objectives and deadlines of Articles 3, 5, 6, 7, 8 and 11.**

Article 32

Repeal and transitional provisions

1. Directive 91/271/EC, as amended by the acts listed in Part A of Annex VII to this Directive, is repealed with effect from ... [the first day of the ***thirty first*** month after the date of entry into force of this Directive] without prejudice to the obligations of the Member States relating to the time limits for the transposition into national law of the Directives set out in Part B of Annex VII to this Directive.
2. ***In respect of Mayotte***, Article 3(1) and Article 6(1) shall apply from 31 December 2030 and Article 3(2) and Article 6(3) shall apply from ... [last day of the ***fifteenth year after the entry into force of this Directive***]
First indent of paragraph 1a of Article 3 and first indent of paragraph 1a of Article 4 of Council Directive 91/271/EEC shall continue to apply until 30 December 2030.
3. ***Without prejudice to the previous subparagraph***, for urban wastewater discharges from agglomerations of 10 000 p.e. and ***above***, Article 5 of Council Directive 91/271/EC shall continue to apply:
 - (a) ***until 31 December 2033 for agglomerations that are not required to comply with the requirements set out in Article 7(3) by ... [the date of entry into force of this Directive];***

- (b) until 31 December 2036 for agglomerations that are not required to comply with the requirements set out in Article 7(3) by 31 December 2033;***
- (c) until 31 December 2039 for agglomerations that are not required to comply with the requirements set out in Article 7(3) by 31 December 2036;***
- (d) until 31 December 2045 for agglomerations that are not required to comply with the requirements set out in Article 7(3) by 31 December 2039;***
- (e) until 31 December 2053 for agglomerations to which the derogation referred to in Article 7(4) applies.***

4. References to the repealed Directive shall be construed as references to this Directive and shall be read in accordance with the correlation table in Annex VIII.

Article 33

Transposition

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with Articles [...] and Annexes [...] [refer to the articles and annexes which have been amended in substance by comparison with the repealed Directives] by ... [the last day of the *thirtieth* month after the date of entry into force of this Directive] . They shall immediately communicate the text of those measures to the Commission .

When Member States adopt those measures , they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. They shall also include a statement that references in existing laws, regulations and administrative provisions to the Directive repealed by this Directive shall be construed as references to this Directive. Member States shall determine how such reference is to be made and how that statement is to be formulated.

2. Member States shall communicate to the Commission the text of the main *measures* of national law which they adopt in the field covered by this Directive.

Article 34

Entry into force

This Directive shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

Articles [...] and Annexes [...] [refer to the articles and annexes which are unchanged by comparison with the repealed Directive] shall apply from ... [the first day of the twenty-fourth month after the date of entry into force of this Directive].

Article 35

Addressees

This Directive is addressed to the Member States.

Done at Brussels,

For the European Parliament
The President

For the Council
The President

ANNEX I

REQUIREMENTS FOR URBAN WASTEWATER

Part A

Collecting systems

Collecting systems shall take into account wastewater treatment requirements.

The design, construction and maintenance of collecting systems shall be undertaken in accordance with the best technical knowledge not entailing excessive costs, notably regarding:

- volume and characteristics of urban wastewater,
- prevention of leaks *of wastewater, infiltration and misconnected inflow into the collecting systems*,
- limitation of pollution of receiving waters due to storm water overflows, *considering the relevant requirements in Article 5 and Annex V*.

Part B

Discharge from urban wastewater treatment plants to receiving waters

1. **Urban** wastewater treatment plants shall be designed or modified so that representative samples of the incoming wastewater and of treated effluent can be obtained before discharge to receiving waters.
2. Discharges from urban wastewater treatment plants **and urban wastewater treatment plants serving agglomerations referred to in** Articles 6, 7 and 8 shall meet the requirements shown in Table 1 **of this Annex**.
3. Discharges from urban wastewater treatment plants referred to in **Article 7(1) or from urban wastewater treatment plants serving agglomerations referred to in Article 7(3)** shall, in addition to the requirements referred to in point 2, meet the requirements **■** in Table 2 of this Annex, **except in cases where Article 7(8) is applied**.
4. Discharges from urban wastewater treatment **plants** referred to in Article 8(1) **or from urban wastewater treatment plants serving agglomerations** referred to in **Article 8(4) shall** meet the requirements set out in Table 3 **of this Annex**.

5. Authorisations *and/or regulations* for discharges from urban wastewater treatment plants using *biomedia shall include*:
- *a description of the technologies incorporating biomedia used in the treatment of urban wastewater treatment plant, including the type and volume of biomedia used in the plant and a description of the measures taken to avoid biomedia releases in the environment;*
 - an obligation to permanently monitor and prevent all biomedia *releases* in the environment;
 - *an obligation to report without delay any significant releases of biomedia into receiving waters to competent authorities.*
6. More stringent requirements than those set out in Tables 1, 2 and 3 shall be applied where necessary to ensure that the receiving waters fulfil the requirements laid down in Directives 2000/60/EC, 2008/56/EC, 2008/105/EC and 2006/7/EC ■ .
7. The points of discharge of urban wastewater shall be chosen, as far as possible, so as to minimize *harmful* effects on receiving waters.

■

Part C

Methods for monitoring and evaluation of results

1. Member States shall ensure that a monitoring method is applied which fulfils the requirements set out in points 2 to 5. ***Where relevant, all methods of analysis shall comply with minimum performance criteria as the ones defined in the Directive 2009/90/EC and other relevant rules.***

Alternative methods to those referred to in points 2, 3 and 4 may be used provided that it can be demonstrated that equivalent results are obtained.

Member States shall provide the Commission with all relevant information concerning the applied monitoring method.

2. Flow-proportional or time-based 24-hour samples shall be collected at the same well-defined point in the outlet and, if necessary, in the inlet of the urban wastewater treatment plant. However, any time-based samples used to monitor micropollutants shall be 48-hour samples.

Good international laboratory practices aiming at minimizing the degradation of samples between collection and analysis shall be applied.

3. The minimum annual number of samples shall be determined according to the size of the treatment plant and be collected at regular intervals during the year:

1 000 to 9 999 p.e.:	One sample per month (<i>see Note 1</i>)
10 000 to 49 999 p. e.:	Two samples per month For micropollutants, one sample per month
50 000 to 149 999 p.e.:	One sample per week. For micropollutants, two samples per <i>month</i>
150 000 p.e. or <i>above</i> :	Two samples per week For micropollutants, two samples per <i>month</i>

Note 1: For agglomerations concerned by seasonal activity, intervals of maximum two months without sampling are accepted provided that additional samples are taken during the months of seasonal activity. A total of 12 samples shall be taken throughout the year.

4. The treated **urban** wastewater shall be assumed to conform to the relevant parameters if, for each relevant parameter considered individually, samples of the water show that it complies with the relevant parametric value in the following way:
- (a) for the parameters specified in Table 1 **and Table 3**, a maximum number of samples which are allowed to fail the requirements, expressed in concentrations and/or percentage reductions, is specified in Table 4;

- (b) for the parameters of Table 1 expressed in concentrations, the failing samples taken under normal operating conditions must not deviate from the parametric values by more than 100 %, except for the parameter total suspended solids, for which deviations from the parametric values of up to 150 % may be accepted;
 - (c) for those parameters specified in Table 2 the annual mean of the samples for each parameter shall conform to the relevant parametric values set out in that table. ■ The values for concentration or for the minimum percentage of reduction shall apply;
 - (d) for the parameters specified in Table 3, ***the frequency of sampling referred to in paragraph 3 of Part C of Annex I means that one sample is taken in the inlet and one sample is taken in the outlet of the urban wastewater treatment plant in order to verify compliance with the minimum percentage of removal of Table 3 of Annex I. The average percentage of removal of all substances used in the calculation shall be used in order to assess whether the required 80 % minimum percentage of removal has been reached.***
5. The samples shall be taken so that they reflect the pollution during dry weather ***flow***. Extreme values for the water quality in question shall not be taken into consideration when they are the result of unusual situations due to heavy rain.
6. Analyses concerning discharges from lagooning shall be carried out on filtered samples; however, the concentration of total suspended solids in unfiltered water samples of such discharges shall not exceed 150 mg/l.

Table 1: Requirements for discharges from urban waste water treatment plants subject to Article 6 of the Directive. The values for concentration or for the percentage of reduction shall apply.

Parameters	Concentration	Minimum percentage of reduction (see Note 4)	Reference method of measurement
Biochemical oxygen demand (BOD ₅ at 20 °C) without nitrification (see Note 1)	25 mg/l O ₂	70-90 40 under Article 6(4)	Homogenized, unfiltered, undecanted sample. Determination of dissolved oxygen before and after five-day incubation at 20 °C ± 1 °C, in complete darkness. Addition of a nitrification inhibitor
Chemical oxygen demand (COD) (see Note 2)	125 mg/l O ₂	75	Homogenized, unfiltered, undecanted sample Potassium dichromate
Total Organic Carbon (see Note 2)	37 mg/l	75	EN 1484
Total suspended solids	35 mg/l (see Note 3)	90 (see Note 3)	<ul style="list-style-type: none"> – Filtering of a representative sample through a 0,45 µm filter membrane. Drying at 105 °C and weighing – Centrifuging of a representative sample (for at least five mins with mean acceleration of 2 800 to 3 200 g), drying at 105 °C and weighing

Note 1: The parameter can be replaced by another parameter: total organic carbon (TOC) or total oxygen demand (TOD) if a relationship can be established between BOD₅ and the substitute parameter.

Note 2: Member States shall measure either the Chemical oxygen demand (COD) or the Total Organic Carbon.

Note 3: This requirement is optional.

Note 4: Reduction in relation to the load of the influent.

Table 2: Requirements for tertiary treatment of discharges from urban wastewater treatment plants referred to in Article 7(1) *or from urban waste water treatment plants serving agglomerations referred to in Article 7(3)*. *For discharges from urban wastewater treatment plants referred to in Article 7(1), both parameters shall apply. For agglomerations referred to in Article 7(3), one or both parameters may be applied depending on the local situation. The values for concentration or for the percentage of reduction shall apply.*

Parameters	Concentration	Minimum percentage of reduction (see Notes 1 <i>and</i> 2)	Reference method of measurement
Total phosphorus (see Note 4)	<i>0,7 mg/l (10 000 – 150 000 p.e.) 0,5 mg/l (more than 150 000 p.e.)</i>	<i>87,5 (10 000 – 150 000 p.e.) 90 (more than 150 000 p.e.)</i>	Molecular absorption spectrophotometry
Total nitrogen (see Note 4)	<i>10 mg/l (10 000 – 150 000 p.e.) 8 mg/l (more than 150 000 p.e.) (see Note 5)</i>	<i>80 (see Note 3)</i>	Molecular absorption spectrophotometry

Note 1: *Reduction in relation to the load of the influent or to the load generated in an agglomeration if the same level of environmental protection can be ensured.*

Note 2: *If a fraction of treated urban wastewater is used for agricultural irrigation, nutrients in that fraction may be included in the calculation of the influent load and be excluded from the discharged load.*

Note 3: *In exceptional situations due to specific local circumstances natural nitrogen retention may be taken into account in the calculation of the minimum percentage reduction in Member States where natural nitrogen retention was taken into account in the calculation of the minimum percentage reduction of nitrogen referred to under Table 2 of Annex I of Council Directive 91/271/EEC and where it is demonstrated that part of the nitrogen originated from urban wastewater can be eliminated in the receiving waters until ... [last day of the twentieth year after the entry into force of the Directive] for the calculation of the minimum percentage reduction of nitrogen referred to in Table 2 of Part B of Annex I if all the following conditions are fulfilled:*

- (1) the average hydraulic retention time of the discharged effluent is at least 1,5 years before it reaches the area sensitive to nitrogen designated under Article 7(2);*
- (2) continuous monitoring and assessment programme of the total nitrogen parameter is ensured:*
 - (a) in the outlets of all urban wastewater treatment plants and where relevant in the urban runoff from agglomerations of 10 000 p.e. and above located in the catchment area of the area designated sensitive to nitrogen under Article 7(2); and*
 - (b) in the relevant inlets of the concerned area designated under Article 7(2); and*

- (c) at the representative sampling locations in the receiving waters and relevant water bodies in the catchment area of the concerned area designated under Article 7(2);*
- (3) the minimum percentage reduction for nitrogen of Table 2 is met; this percentage shall be calculated on the basis of the data collected from continuous monitoring and assessment programme referred to in point (2);*
- (4) it can be demonstrated that nitrogen releases from urban wastewater treatment plants in the catchment area are not harmful for the environment, including for biodiversity, and human health and do not modify the ecosystem;*
- (5) the concentration of nutrients in the areas referred to in point (c) of condition (2) are compliant with the condition set under Annex V.1.2.1 of Directive 2000/60/EC to define good ecological status of those areas;*
- (6) the use of natural nitrogen retention is reported to the Commission in accordance with Article 22(1)(a), as well to potentially affected neighboring Member States, together with all the elements necessary to verify that conditions (1), (2), (3), (4) and (5) above are fulfilled.*

Note 4: This requirement shall apply on ... [date of adoption of this Directive] to existing urban wastewater treatment plants obliged to meet the deadlines established under Article 7(1) and to agglomerations under Article 7(3). Until these deadlines are met, the obligations of Article 32(3) shall apply to these urban wastewater treatment plants.

Note 5: Where the temperature in the effluent of the biological reactor is below 12 °C the results of the samples taken may be excluded from the calculation of the annual mean for nitrogen as referred to in point (4)(c) of Part C of this Annex where all the following can be demonstrated:

- (1) no adverse effect to the environment is ensured;*
- (2) excessive costs and/or excessive energy consumption would be required to reach the values for nitrogen in Table 2.*

Where the temperature in the effluent of the biological reactor is below 5 °C the results of the samples taken may be excluded from the calculation of the annual mean for nitrogen as referred to in point (4)(c) of Part C of this Annex.

Table 3: Requirements for quaternary treatment of discharges from urban wastewater treatment plants referred to in Article 8(1) and *or from urban wastewater treatment plants serving agglomerations referred to in Article 8(4)*.

Indicators	Minimum percentage of removal <i>in relation to the load of the influent</i>
Substances that can pollute water even at low concentrations (see Note 1)	80 % (see Note 2)

Note 1: The concentration of the organic substances referred to in points (a) and (b) shall be measured.

(a) Category 1 (substances that can be very easily treated):

- (i) Amisulprid (CAS No 71675-85-9),
- (ii) Carbamazepine (CAS No 298-46-4),
- (iii) Citalopram (CAS No 59729-33-8),
- (iv) Clarithromycin (CAS No 81103-11-9),
- (v) Diclofenac (CAS No 15307-86-5),
- (vi) Hydrochlorothiazide (CAS No 58-93-5),
- (vii) Metoprolol (CAS No 37350-58-6),
- (viii) Venlafaxine (CAS No 93413-69-5);

- (b) Category 2 (substances that can be easily disposed of):
- (i) Benzotriazole (CAS No 95-14-7),
 - (ii) Candesartan (CAS No 139481-59-7),
 - (iii) Irbesartan (CAS No 138402-11-6),
 - (iv) mixture of 4-Methylbenzotriazole (CAS No 29878-31-7) and 5-methylbenzotriazole (CAS No 136-85-6).

Note 2: The percentage of removal shall be calculated *on dry weather flow* for at least six substances. The number of substances in category 1 shall be twice the number of substances in category 2. If less than six substances can be measured in sufficient concentration, the competent authority shall designate other substances to calculate the minimum percentage of removal when it is necessary. The average of the *specific* percentages of removal of all *single* substances used in the calculation shall be used in order to assess whether the required 80 % minimum percentage of removal has been reached.

Table 4: *Requirement for samples*

Series of samples taken in any year	Maximum permitted number of samples which fail to conform
4-7	1
8-16	2
17-28	3
29-40	4
41-53	5
54-67	6
68-81	7
82-95	8
96-110	9
111-125	10
126-140	11
141-155	12
156-171	13
172-187	14
188-203	15
204-219	16
220-235	17
236-251	18
252-268	19
269-284	20
285-300	21
301-317	22
318-334	23
335-350	24
351-365	25

ANNEX II

AREAS SENSITIVE TO EUTROPHICATION

1. Areas located in the catchments of the Baltic Sea, the Black Sea, ■ the North Sea *and* the Adriatic Sea identified as sensitive to eutrophication under *Directives 2008/56/EC or 2000/60/EC*;
2. Natural freshwater lakes, other freshwater bodies, estuaries and coastal waters which are found to be eutrophic or which in the near future may become eutrophic if protective action is not taken.

The following elements shall be taken into account when considering which nutrient should be reduced by further treatment:

- (a) lakes and streams reaching lakes/reservoirs/closed bays which are found to have a poor water exchange, whereby accumulation may take place. In these areas, the removal of phosphorus should be included unless it can be demonstrated that the removal will have no effect on the level of eutrophication. Where discharges from large agglomerations are made, the removal of nitrogen may also be considered;

- (b) estuaries, bays and other coastal waters which are found to have a poor water exchange, or which receive large quantities of nutrients. Discharges from small agglomerations are usually of minor importance in those areas, but for large agglomerations, the removal of phosphorus and/or nitrogen should be included unless it can be demonstrated that the removal will have no effect on the level of eutrophication;
3. Surface freshwaters intended for the abstraction of drinking water which could contain more than the concentration of nitrate laid down under the relevant provisions of Directive (EU) 2020/2184 *if* protective action is not taken;
 4. Areas where further treatment than that prescribed in Article 7 of this Directive is necessary to comply with other Union acts in the environmental field, including in particular water bodies covered by Directive 2000/60/EC which are at risk of not maintaining or achieving good ecological status or potential.
 5. Any other areas found by the Member States to be sensitive to eutrophication.
-

ANNEX III

LIST OF PRODUCTS COVERED BY EXTENDED PRODUCER RESPONSIBILITY

1. Medicinal products for human use falling within the scope of Directive 2001/83/EC of the European Parliament and of the Council⁵².
 2. Cosmetic products falling within the scope of Regulation (EC) No 1223/2009 of the European Parliament and of the Council of 30 November 2009 on cosmetic products⁵³.
-

⁵² Directive 2001/83/EC of the European Parliament and of the Council of 6 November 2001 on the Community code relating to medicinal products for human use (OJ L 311, 28.11.2001, p. 67).

⁵³ Regulation (EC) No 1223/2009 of the European Parliament and of the Council of 30 November 2009 on cosmetic products (OJ L 342, 22.12.2009, p. 59).

ANNEX *IV*

INDUSTRIAL SECTORS

1. Milk-processing
 2. Manufacture of fruit and vegetable products
 3. Manufacture and bottling of soft drinks
 4. Potato-processing
 5. Meat industry
 6. Breweries
 7. Production of alcohol and alcoholic beverages
 8. Manufacture of animal feed from plant products
 9. Manufacture of gelatine and of glue from hides, skin and bones
 10. Malt-houses
 11. Fish-processing industry
-

ANNEX V

CONTENT OF THE INTEGRATED URBAN WASTEWATER MANAGEMENT PLANS

1. An analysis of the initial situation of the drainage area of the concerned agglomeration, including at least the following:
 - (a) a detailed description of the network of collecting systems, the urban wastewater and urban runoff storage **and conducting** capacities of that network and the existing urban wastewater treatment capacities in case of rainfall;
 - (b) ***In case of combined sewers***, a dynamic analysis of the flows of urban wastewaters in case of rainfall, based on ***monitoring data or*** the use of hydrological, hydraulic and water quality models that take into account state-of-the-art climate projections and including an estimate of the pollution loads ***of the parameters referred to in Table 1 and, where relevant, Table 2 of Annex I as well as microplastics and relevant pollutants*** released in receiving waters in case of rainfall;
 - (c) ***In case of separate sewers***, a detailed description of the monitoring requirements at relevant points of separate systems where discharges of urban runoff are expected to be polluted as identified under Article 5(2), point (d), to identify relevant and feasible measures as required in point 3 of this Annex.

2. Objectives for the reduction of pollution from storm water overflows ■ , including the following:
 - (a) an indicative ***non-binding*** objective that storm water overflow ■ represents ***a small percentage that cannot be*** more than 2 % of the annual collected urban wastewater load calculated in dry weather conditions.

This indicative ***non-binding objective*** shall be met by:

 - (i) 31 December ***2039*** for all agglomerations of 100 000 p.e. and above;
 - (ii) 31 December ***2045*** for agglomerations of 10 000 p.e. and above ***referred to in*** Article 5;
 - (b) the progressive ***reduction of macroplastics***.
3. The measures to be taken to achieve the objectives referred to in point 2 ***in accordance with the deadlines set in point 2 of this Annex*** accompanied with a ***timeline for the implementation of the measures and a distinction between measures already in place and to be taken***. ***It shall also contain a*** clear identification of the actors involved and their responsibilities in the ***implementation*** of the integrated plan.

4. When assessing which measures to be taken under point 3, Member States shall ensure that their competent authorities consider at least the following:
- (a) firstly, preventive measures aiming at avoiding the entry of unpolluted rain waters into collecting systems, including measures promoting natural water retention or rainwater harvesting, and measures increasing green **and blue spaces in urban areas in order to reduce storm water overflows** or limiting impermeable surfaces in the agglomerations;
 - (b) secondly, measures to better manage and optimize the use of existing infrastructure including collecting systems, storage volumes, urban wastewater treatment plants with the aim to ensure that **releases of untreated urban wastewater or polluted urban runoff** into receiving waters are minimised;
 - (c) finally, where necessary to achieve the objectives referred to in point 2, additional mitigation measures including the adaptation of the infrastructure for the collection, storage and treatment of urban wastewater, **such as connecting newly built urban areas to separate sewers, where relevant**, or the creation of new infrastructures with a priority to green **and blue infrastructure** vegetated ditches, treatment wetlands and storage ponds designed in order to support biodiversity. Where relevant, water reuse shall be considered in the context of the development of the integrated urban wastewater management plans referred to in Article 5.
-

ANNEX VI

INFORMATION TO THE PUBLIC

- (1) The competent authority and the operator(s) responsible for urban wastewater collection and treatment services, including information on the ownership structure of the operators and their contact information.
- (2) The total urban wastewater load expressed in population equivalents (p.e.) generated in the agglomeration, with details on the share of that load (in %) that is:
 - (a) collected and treated in urban wastewater treatment plants;
 - (b) treated by registered individual systems;
 - (c) not collected or treated.
- (3) Where relevant, a justification for why a certain load of urban wastewater is not collected or treated.
- (4) Information on the quality of the urban wastewater discharged from the agglomeration to each receiving water body, including the following elements:
 - (a) annual average concentrations and the load of pollutants covered by Article 21 released by each urban wastewater treatment plant;

- (b) an estimate of the load of the discharges from individual systems for the parameters referred to in Tables 1 and 2 of Annex I;
 - (c) **for agglomerations above 10 000 p.e.**, an estimate of the load of the discharges from combined sewer and **■** storm water overflows for the parameters referred to in Tables 1 and 2 of Annex I.
- (5) total annual investment costs and total annual operational costs, with a distinction between collection and treatment costs, total annual costs related to staff, energy, consumables, administration and other costs as well as average annual investment and operational costs per **■** cubic meter of urban wastewater collected and treated, **and per average household where costs are recovered totally or partly through a water tariff system or per agglomeration level in other cases;**
- (6) information on how the costs referred to in point (5) are covered and, where costs are recovered through a tariff system, information on the structure of the tariff per cubic meter of urban wastewater collected and treated information on the structure of the tariff either per cubic meter of urban wastewater collected and treated or per cubic meter of water supplied, including fixed and variable costs and a breakdown between costs for collection, treatment, administration and other costs;
- (7) investment plans for urban wastewater collection and treatment infrastructures at agglomeration level, with foreseen impacts on urban wastewater services tariffs, and intended financial and societal benefits;

- (8) for each urban wastewater treatment plant *of 10 000 p.e. and above*:
- (a) the total load (in p.e.) treated and the energy required to treat the urban wastewater (in kWh total and per cubic meter);
 - (b) the total renewable energy produced (GWh/year) each year, including a breakdown per source of energy;
-
- (9) the total *direct* greenhouse gas emissions (in tonnes of CO₂ equivalent) produced or avoided per year by the operation of urban wastewater collection and treatment infrastructures *of 10 000 p.e. and above* in each agglomeration and, *when* available, the total *indirect* greenhouse gas emissions (in tonnes of CO₂ equivalent) produced *notably* during the construction of those infrastructures;
- (10) a summary of the nature and statistics regarding complaints and of the answers provided by the urban wastewater treatment plant operators on matters falling within the scope of this Directive.
- (11) *upon justified request, consumers shall be given access to historical data for information under points (2), (4), (8) and (9), dating back up to 10 years, and not earlier than ... [day of entry into force of the Directive].*
-

ANNEX VII

Part A

Repealed Directive

with list of the successive amendments thereto

(referred to in Article [19])

Council Directive 91/271/EEC (OJ L 135, 30.5.1991, p. 40)	
Commission Directive 98/15/EC (OJ L 67, 7.3.1998, p. 29)	
Regulation (EC) No 1882/2003 of the European Parliament and of the Council (OJ L 284, 31.10.2003, p. 1)	only Annex III, point 21
Regulation (EC) No 1137/2008 of the European Parliament and of the Council (OJ L 311, 21.11.2008, p. 1)	only Annex, point 4.2
Council Directive 2013/64/EU (OJ L 353, 28.12.2013, p. 8)	only Article 1

Part B

Time-limits for transposition into national law

Directive	Time-limit for transposition
91/271/EC	30 June 1993
98/15/EC	30 September 1998
2013/64/EU	31 December 2018 as regards Article 1(1), (2) and (3) 30 June 2014 as regards Article 1(5), point (a) 31 December 2014 as regards Article 1(5), point (b)
